

that freak March storm, I will plan for the worst. When we have had record amounts of snowfall after the weatherman said 5 inches and it turned out to be 10 inches, I will plan for the worst. And last year when I didn't get any Christmas lights up on my roof because it turned ugly around the 24th of October and never got any better, I will plan for the worst. This year I have my Christmas lights up and won't have to go skating around on the roof in a 20 mph wind freezing my fingers. Now all I have to do is get through Thanksgiving, Black Friday, the Bowl Season, Christmas, and New Years before I have to take my lights down. Aren't the holiday's fun?

Our continuing look at the North Dakota constitution takes us to Article III, Powers Reserved to the People, Section 2: "The legislative assembly may provide by law for a procedure through which the legislative council may establish an appropriate method for determining the fiscal impact of an initiative measure and for making the information regarding the fiscal impact of the measure available to the public."

The legislative council is a state agency made up of legal, fiscal, information technology, and administrative services which are available to legislators in order to perform their

the House of Representatives before attaining the state's highest office.

Guy was a farmer and instructor at the ND Ag. College before he went to served in the Navy during WW II. Some of his accomplishments include: Office of Management and Budget, promoting sugar beet refineries and coal-fired electrical generation, the North Dakota Heritage Center, and he established the Theodore Roosevelt Rough Rider Award. His peers voted him the chairmanship of the National Governor's Conference.

I was watching football this weekend (imagine that), and a receiver went up in the air and caught the ball and then was hit low. He did a 360 degree turn in mid air. It was ruled a catch on the field even though the ball came loose once he hit the ground. On further review, the video showed that the ball had come loose during his summersault and before he hit the ground and it was ruled an incomplete pass. That same thing happened to me when I was in college except it was ruled a catch, and I helped save the game. Sometimes you just have to bite your lip, take the compliments and just be thankful for no video replay. Have a good one!

Yours in the Spirit of the Republic, Coach

perb. With a lot of young players and limited numbers on the team, there will playing time available at all levels. We have some terrific competition at practice to fill some of the available varsity and junior varsity spots. The boys have responded well to the challenge so far.

Another area that our players must improve on is getting used to the speed of the game at the next level. As we learn the playbook, we need to be more instinctive with our basketball movements. If a player is thinking, he's not reacting. As you all know, our district is loaded with quality, athletic teams that don't give their competition much time to process information. We need to develop more basketball sense and savvy to compete this year in district play.

One exciting new addition to the game that players and coaches alike must get used to is the addition of the 35 second shot clock. It will allow for unfamiliar situations that we need to prepare for, and it should make the Class B game more exciting.

Overall, we have a good group of hard working young men that are ready to represent our communities of Glen Ullin and Hebron to the best of their abilities. Come out this season and support the boys and girls Bearcat basketball teams!

Our first game of the season tips off on November 28th in Hebron at 4:30 p.m. for a 3 game night against the Beach Buccaneers. The second contest is in Glen Ullin vs. Mott-Regent on Dec. 2nd starting at 6:00 p.m., before the varsity heads to Dickinson Trinity for the Roughrider tournament on Dec. 6th, 8th, and 10th.

Deer disease found in North Dakota cattle

A form of an infectious and often fatal disease usually associated with deer has been found in North Dakota cattle.

"Epizootic hemorrhagic disease (EHD) has been confirmed in three head of cattle in Morton and Grant counties," said Dr. Susan Keller, North Dakota state veterinarian Tuesday. "Although infected cattle usually recover from this disease, producers should be aware of its symptoms."

Keller urged livestock producers to contact their veterinarians if their animals display oral erosions or lameness. She emphasized the disease poses no threat to human health.

A viral disease, EHD primarily attacks wild ruminants, such as deer, bighorn sheep and antelope, but can also affect domestic animals - cattle, sheep and goats. It is spread by midges, tiny, biting flies of the genus *Culicoides*.

Although EHD is often fatal to deer, its effect on cattle is usually much less severe. Infected animals may show some lameness and sore mouths. Closely related to, but different than bluetongue, EHD exists in several serotypes. The affected North Dakota cattle have been diagnosed with EHD2.

STATE OF NORTH DAKOTA
PUBLIC SERVICE COMMISSION
Oliver Wind III, LLC
48 MW Wind Energy Center - Morton
County
Siting Application
Case No. PU-11-561
NOTICE OF FILING AND NOTICE OF HEARING
November 10, 2011

On October 31, 2011, Oliver Wind III, LLC filed an application for a certificate of site compatibility to authorize construction of the 48 MW Wind Energy Center consisting of up to 30 wind turbine generators and associated facilities in Morton County, North Dakota as shown on the attached map. A Public Hearing on the application is scheduled to begin on December 20, 2011 at 10:00 a.m. CST at the Mandan City Hall, 205 Second Ave NW, Mandan, ND 58554. The issues to be considered are:

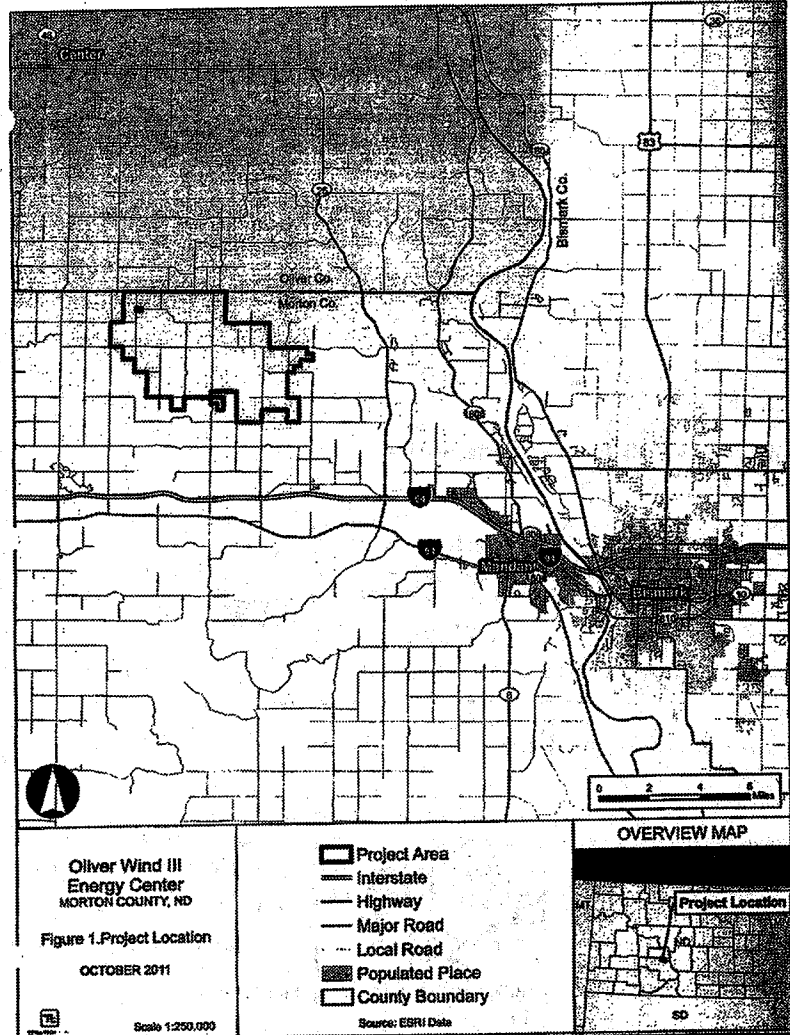

1. Will the location, construction, and

operation of the proposed facilities produce minimal adverse effects on the environment and upon the welfare of the citizens of North Dakota?

2. Are the proposed facilities compatible with the environmental preservation and the efficient use of resources?

3. Will the proposed facility locations minimize adverse human and environmental impact while ensuring continuing system reliability and integrity and ensuring that energy needs are met and fulfilled in an orderly and timely fashion?

For more information contact the Public Service Commission, State Capitol, Bismarck, North Dakota 58505, 701-328-2400; or Relay North Dakota 1-800-366-6888 TTY. If you require any auxiliary aids or services, such as readers, signers, or Braille materials please notify the Commission, at least 24 hours in advance.

an approach to lot 8, Block 42 Western Addition from the bypass (Hwy 49) against the wishes of the State DOT. Motion carried unanimously.

Sheriff's Report: Deputy Shipman informed the council that he has hired a new deputy for Glen Ullin who will be starting October 24.

Maintenance Report: The new maintenance supervisor, Darcy Fitterer, reported on the work he has accomplished this week. His top priority will be to fix the potholes around town and to get all the equipment in working order in the next couple of weeks. He will rent a chop saw to cut out some of the damaged blacktop around town.

Culvert: Moved by D Martwick, seconded by Clark to withdraw the approval that was given to Michael Corazzini on May 10, 2010 allowing him to extend the culvert on his property at 401 Second St S (Block 33) until further study by the city engineer. If it can be extended without restricting water flow or causing more damage than good it will again be approved.

Water Report: The shut off/turn on of water meters when new homeowners move in was discussed.

ND Insurance Department State Bond: Moved by Schneider, seconded by Clark to approve the application for this bond. Motion carried unanimously.

Building Permit: Moved by R Martwick, seconded by D Martwick to approve the building permit for a new house for Sid Sanden on lots 16-18 Block 10, Glen Ullin Proper. Motion carried unanimously.

Funds Transfer: Moved by Schneider, seconded by Glasser to transfer \$800 from the water fund to the
