**RE: Enbridge Pipelines (North Dakota) LLC – Grenora Station Expansion Project (Case No. PU-11-605) Tree and Shrub Mitigation**

Dear Mr. Nitschke,

On March 21, 2012, the Commission issued its Findings of Facts, Conclusion of Law and Order (Order) regarding the Grenora Station Expansion Project (Case No. PU-11-605). In accordance with the Tree and Shrub Mitigation Specifications identified in the Commission's Order, Enbridge is required to inventory and replace trees and shrubs that were removed during the Project.

Enbridge conducted a pre-construction inventory for trees and shrubs and submitted the results of that survey on June 15, 2012 (Item #53 on Docket PU-11-605). A single patch of hawthorn shrubs was inventoried in the extreme west-central portion of the project area, several hundred feet away from the facility footprint and construction workspace.

The majority of construction activities on the Project were completed in 2012. Restoration activities will continue in 2013 until final stabilization is achieved. As none of the shrubs were impacted by the project, no mitigation will be required per Condition 15 of the Tree and Shrub Mitigation Specifications in the Order.

Sincerely,

A handwritten signature in blue ink that reads 'Sara Ploetz'.
