RE: ONEOK Rockies Midstream, L.L.C. – Stateline NGL Pipeline Project
State Conservation Priority Species Consultation, State Plots Land Review.

ONEOK Rockies Midstream, L.L.C. (ONEOK), a subsidiary of ONEOK Partners, LP, Tulsa, Oklahoma, has proposed the construction of the Stateline NGL Pipeline. This project is designed to transport natural gas liquids (NGL) a distance of approximately 53.7 miles from its origin at the ONEOK Stateline 1 & 2 Gas Plants in Williams County, North Dakota to the ONEOK Riverview Terminal in Richland County, Montana. The project is currently scheduled to begin construction in April 2012 and will continue for approximately 3 to 6 months with restoration to immediately follow.

The proposed project covers a distance of approximately 12.8 miles in Williams County, North Dakota. The proposed route is described below as well as on the attached topographic maps.

In Williams County, North Dakota the pipeline crosses:

- Township 154N, Range 103W, Sections 5, 6, 7, 18, 19,
- Township 154N, Range 104W, Sections 24, 25, 26, 35,
- Township 153N, Range 104W, Sections 2, 10, 11,
- Township 155N, Range 103W, Sections 21, 28, 32, 33

Pipeline construction activities will typically occupy a 100-foot right of way. Following construction, the pipeline will occupy a 50-foot permanent right of way.

The purpose of this correspondence is twofold: to request a review of the proposed pipeline corridor for presence or absence of State Conservation Priority Species; and to request confirmation of the presence or absence of North Dakota Game and Fish Department PLOTS Lands within the proposed pipeline corridor (see attached).

E3 Environmental, LLC (E3) has been retained by ONEOK to provide environmental consulting support for this project. Should you have any questions or require additional information, please contact me at 651.282.0655 or asampson@go2e3.com.
