PUBLIC SERVICE COMMISSION**

**Basin Electric Power Cooperative
345 kV Trans. Line - Mercer, Dunn, McKenzie, Williams
Siting Application**

Case No. PU-11-696

SUPPLEMENTAL ORDER

March 23, 2016

On April 23, 2014, the Commission issued Corridor Certificate No. 152 and Route Permit No. 164 to Basin Electric Power Cooperative authorizing approximately 197 miles of 345 kV and 230 kV electric transmission line and associated facilities from the Antelope Valley Station near Beulah to the Neset Substation near Tioga, North Dakota.

On January 28, 2016, Basin Electric filed an amendment requesting three minor corridor and route modifications to address landowner concerns in Williams County:

Location #1: T154N, R102W, Sections 2, 3, & 10;
T155N, R102W, Sections 23, 26, & 35.

Location #2: T155N, R101W, Sections 5, 8, 17, & 20;
T156N, R101W, Sections 32 & 33.

Location #3: T156N, R100W, Sections 33 & 34.

On February 10, 2016, the Commission found the amendment complete and issued a Notice of Opportunity for Hearing, which provided until March 14, 2016 for receiving written comments or hearing requests. No response was received. The notice identified the following issues to be considered:

1. Will the location, construction, and operation of the proposed amended facilities produce minimal adverse effects on the environment and upon the welfare of the citizens of North Dakota?
2. Are the proposed amended facilities compatible with the environmental preservation and the efficient use of resources?
3. Will the proposed amended facility locations minimize adverse human and environmental impact while ensuring continuing system reliability and integrity and ensuring that energy needs are met and fulfilled in an orderly and timely fashion?

No impact is anticipated on any exclusion or avoidance area. There would be a slight decrease of 0.7 acres of wetlands impacted and a slight decrease of 0.5 acres of grassland habitat within the corridor/route. The total length of the transmission line would increase by 0.5 miles.

The location, construction, and operation of the proposed facilities will produce minimal adverse effects on the environment and upon the welfare of the citizens of North Dakota.

The proposed facilities are compatible with the environmental preservation and the efficient use of resources.

The proposed facility locations will minimize adverse human and environmental impact while ensuring continuing system reliability and integrity and ensuring that energy needs are met and fulfilled in an orderly and timely fashion.

The proposed project is of such design, location, and purpose that it will produce minimal adverse effects.

Order

The Commission Orders Fourth Amended Certificate of Corridor Compatibility No. 152 and Fourth Amended Route Permit No. 164 are issued to Basin Electric Power Cooperative authorizing its proposed route and corridor modifications.

PUBLIC SERVICE COMMISSION

		
Randy Christmann Commissioner	Julie Fedorchak Chairman	Brian P. Kalk Commissioner

**PUBLIC SERVICE COMMISSION
STATE OF NORTH DAKOTA**

**Fourth Amended
Certificate of Corridor Compatibility Number 152**

This is to certify that the Commission has designated a transmission facility corridor for Basin Electric Power Cooperative for approximately 200 miles of new, high voltage 345 kV and 230 kV alternating current transmission line and associated facilities extending from Basin Electric's existing Antelope Valley Station and terminating at the Neset 230 kV Substation located near Tioga, North Dakota

This certificate is issued in accordance with the Findings of Fact, Conclusions of Law and Order of this Commission dated April 23, 2014 and Supplemental Orders dated September 17, 2014, March 11, 2015, September 2, 2015 and March 23, 2016 in Case No. PU-11-696 and is subject to the conditions and limitations noted in those Orders.

Bismarck, North Dakota, March 23, 2016.
