SECTION 5 - SWITCHED ACCESS SERVICE (CONT'D)

5.6 BILLING OF ACCESS MINUTES:

When recording originating calls over FGD with SS7 signaling, usage measurement begins with the transmission of the initial address message by the switch for direct Trunk groups and with the receipt of an exit message by the switch for tandem Trunk groups. The measurement of originating FGD usage ends when the entry switch receives or sends a release message, whichever occurs first.

If a Customer fails to provide this information, Company will assign a default PVU equal to zero.
