

MEMORANDUM

To: Darrell Nitschke, Executive Secretary
From: Christopher Marohl, Public Utility Analyst *CHAM*
Date: August 1, 2012
Re: Damage Prevention Enforcement Case No. GS-12-37

In this damage prevention case the Commission and Mr. Maddox agreed to a consent order effective today that assesses a suspended fine of \$500. That order failed to mention that the incident did **not** result in any damage to underground facilities or injuries. Based on the Commission's Damage Prevention Plan this fact is considered in determining the amount of fine that is assessed and was applied consistently for this case. This memo merely serves as a reference as to how this fact helped the Commission reached its determination of \$500.
