Fargo Relocation Project – Cass County
Siting Application**

**Case No. PU-12-42
OAH File No. 20120081**

NOTICE OF FILINGS AND NOTICE OF HEARING

February 29, 2012

On February 8, 2012, Magellan Midstream Partners, L.P. (Magellan) filed an application for a certificate of corridor compatibility and an application for a route permit to authorize the relocation of approximately 2,300 feet of existing 6-inch and 8-inch refined petroleum products pipelines, all in the city limits of West Fargo in Cass County, North Dakota. The project is shown on the attached map.

On February 8, 2012, Magellan filed an application for waivers of procedures and time schedules including:

- Procedures that require separate filings of applications for a certificate of corridor compatibility and a route permit,
- Procedures that require separate notices of such applications,
- Procedures that require separate hearings on such applications,

The Commission finds the applications are complete.

A Public Hearing on the applications is scheduled to be held on **April 12, 2012, beginning at 10:00 a.m. CDT at the West Fargo Commission Room, 800 4th Ave E, West Fargo, North Dakota, 58784.**

The issues to be considered in Magellan's application for waiver of procedures and time schedules:

1. Are the proposed facilities of such length, design, location, or purpose that they will produce minimal adverse effects and that adherence to applicable procedures and time schedules may be waived?
2. Is it appropriate for the Commission to waive any procedures and time schedules as requested in the application?

The issues to be considered in Magellan's applications for certificate of corridor compatibility and route permit:

1. Will the location, construction, and operation of the proposed facilities produce minimal adverse effects on the environment and upon the welfare of the citizens of North Dakota?

2. Are the proposed facilities compatible with the environmental preservation and the efficient use of resources?
3. Will the proposed facility locations minimize adverse human and environmental impact while ensuring continuing system reliability and integrity and ensuring that energy needs are met and fulfilled in an orderly and timely fashion?
