Annual Drinking Water Quality Report 2011

This is to inform the residents of the City of McClusky that the Annual Drinking Water Quality Report for the year 2011 is on file in

Nancy Boldt, boat and water safety coordinator for the North Dakota Game and Fish Department. The single most important part of safety on the water is wearing a personal flotation device.

North Dakota law requires all children ages 10 and younger to wear a personal flotation device while in boats of less than 27 feet in length. The law also requires all personal watercraft users to wear a life jacket, Boldt said, as well as anyone towed on skis, tubes, boards or other similar devices.

Water users should make sure to wear life jackets that are the appropriate size, and in good condition. It is also important that children wear a PFD while swimming.

When purchasing a PFD, Boldt suggests considering the most prevalent water activity. Water skiers and tubers should wear a life jacket with four nylon straps rather than one with a zipper, because straps are stronger than zippers upon impact with water. Anglers or persons paddling a canoe should opt for a PFD that is comfortable enough to wear for an entire outing.

Water skiers and tubers are reminded it takes three to ski and tube. When a person is towed on water skis or a similar device, an observer other than the operator is required on the vessel.

It is important for swimmers to know water depth, as serious injuries can occur from diving into water. Large objects hidden below the water's surface
