**Annual Drinking Water Quality Report
Grand Forks - Trail Water District
2011**

We're pleased to present to you this year's Annual Drinking Water Quality Report. This report is designed to inform you about the safe clean water we deliver to you every day. Our constant goal is to provide you with a safe and dependable supply of drinking water. We want you to understand the efforts we make to continually improve the water treatment process and protect our water resources. We are committed to ensuring the quality of your water. Grand Forks-Trail Water District utilizes title Elk Valley Aquifer, drawn from 15 drilled wells. Grand Forks-Trail Water District's wells are located near the City of Larimore.

Grand Forks-Trail Water District is participating in the North Dakota Wellhead Protection Program. Relevant information on the Wellhead Protection plan is available during normal business hours at our Thompson office. The North Dakota Department of Health has prepared a Source Water Assessment for Grand Forks-Trail Water District. Information on these programs is available to the public during normal business hours

Maximum Residual Disinfectant Level (MRDL) - The highest level of a disinfectant allowed in drinking water. There is convincing evidence that addition of a disinfectant is necessary for control of microbial contaminants.

Maximum Residual Disinfectant Level Goal (MRDLG) - The level of a drinking water disinfectant below which there is no known or expected risk to health. MRDLGs do not reflect the benefits of the use of disinfectants to control microbial contaminants.
