Darrell Nitschke  
Executive Secretary  
Public Service Commission  
600 East Boulevard Avenue – Dept. 408  
Bismarck, ND 58505-0480

Dear Mr. Nitschke:

Enclosed is an update to the Initial North Dakota P.S.C. Price Schedule No. 2 containing terms, conditions and rates for Intrastate Access Services for MLGC, LLC. filed on June 7, 2012. The filing makes typographical corrections to the footnotes on pages 23 and 24 of the tariff.

The effective date of the filing is July 13, 2012.

Questions related to this filing may be addressed to me at 651-621-8631.

Sincerely,

Patrick D. Holton  
Telecommunications Consultant

ACCESS SERVICE TARIFF

SECTION 2. GENERAL REGULATIONS (Cont.)

2.3 Obligations of the Customer (Cont.)

2.3.10 Jurisdictional Report Requirements (Cont.)

(C) Identification and Rating of VoIP – PSTN Traffic

(1) Scope

VoIP-PSTN Traffic is defined as traffic exchanged between the Telephone Company end user and the customer in time division multiplexing (“TDM”) format that originates and/or terminates in Internet protocol (“IP”) format. This section governs the identification of VoIP-PSTN Traffic that is required to be compensated at interstate access rates as described in Section 6.1 of this Tariff. Specifically, this section establishes the method of separating such traffic (referred to in this tariff as “Relevant VoIP-PSTN Traffic”) from the customer’s traditional intrastate access traffic, so that such Relevant VoIP-PSTN Traffic can be billed in accordance with the FCC Order.

(2) Rating of VoIP-PSTN Traffic

The Relevant VoIP-PSTN Traffic identified in accordance with this tariff section will be billed at rates equal to the Telephone Company’s applicable tariffed interstate switched access rates as specified in Section 10 of this Tariff following#.

(3) Calculation and Application of Percent-VoIP-Usage Factor

- (a) The Telephone Company will determine the number of VoIP-PSTN Traffic minutes of use (MOU) to which interstate rates will be applied under (2), preceding, by applying an originating Percent VoIP Usage (PVU) factor to the total intrastate access MOU originated# by a Telephone Company end user and delivered to the customer and by applying a terminating PVU factor to the total intrastate access MOU terminated by a customer to the Telephone Company’s end user.

#Per FCC Second Order on Reconsideration as noted in Section 6.1, intrastate access rates will apply to originating intrastate VoIP traffic from July 13, 2012 to June 30, 2014.

(T,C)

ACCESS SERVICE TARIFF

SECTION 2. GENERAL REGULATIONS (Cont.)

2.3 Obligations of the Customer (Cont.)

2.3.10 Jurisdictional Report Requirements (Cont.)

(C) Identification and Rating of VoIP – PSTN Traffic (Cont'd)

(3) Calculation and Application of Percent-VoIP-Usage Factor (Cont'd)

- (b) The customer will calculate and furnish to the Telephone Company an originating# PVU-C factor representing the whole number percentage of the customer's total originating intrastate access MOU that the customer receives from the Telephone Company and that is terminated in IP format and that would be billed by the Telephone Company as intrastate originating access MOU.
- (c) The customer will calculate and furnish to the Telephone Company a terminating PVU-C factor representing the whole number percentage of the customer's total terminating intrastate access MOU that the customer sent to Telephone Company and which originated in IP format and that would be billed by the Telephone Company as intrastate terminating access MOU.
- (d) The customer shall not modify their reported PIU factor to account for VoIP - PSTN Traffic.
- (e) The Telephone Company will calculate two factors (the "PVU-TC terminating factor" and "PVU-TC originating# factor") representing the percentage of the Telephone Company's total intrastate switched access MOU that the Telephone Company terminates and originates, respectively on its network in IP format. These factors, if greater than 0%, will be posted on the Telephone Company's web site.
- (f) The Telephone Company will use the PVU-C and PVU-TC factors to calculate two PVU factors that represent the percentage of total intrastate access MOU exchanged in TDM format (directly or indirectly) between the Telephone Company and the customer that originate# or terminate in IP format, whether at the Telephone Company's end, at the customer's end, or at both ends.

#Per FCC Second Order on Reconsideration as noted in Section 6.1, intrastate access rates will apply to originating intrastate VoIP traffic from July 13, 2012 to June 30, 2014.
