**PUBLIC SERVICE COMMISSION**

RE: FCC Report and Order 11-161

Dear Mr. Nitschke:

Effective May 1, 2012, IdeaOne Telecom, Inc. D.B.A. Enventis issued a revised North Dakota PSC No. 1 tariff containing intrastate Access in its Section 6. At that time, the access material mirrored the IdeaOne Telecom Group LLC North Dakota PSC No 2 tariff on file with the Commission. The No.2 tariff was requested withdrawn upon acceptance of the revised intrastate tariff.

This intrastate tariff revision will replace Section 6 in its entirety, as the access material had not been updated since 2000 and to demonstrate compliance with the FCC order, the access material needed to be converted to LTR format. In addition, this tariff filing is the first step in implementing the "Transitional Intrastate Access Service" reductions mandated by the FCC's Report and Order and Further Notice of Proposed Rulemaking in WC Docket Nos. 10-90, etc. (FCC 11-161). The documentation and calculation pages supporting these rate changes are attached.

IdeaOne respectfully requests the tariff filing to be effective July 1, 2012.

If you have any questions, please contact me at (507) 387-1728.

Sincerely,

Patricia Burt  
Senior Regulatory Affairs Analyst  
IdeaOne Telecom, Inc. D.B.A. Enventis

GENERAL TARIFF AND PRICE LIST

SECTION 6 – ACCESS SERVICE

6.1 ACCESS SERVICE

6.1.1 General

Access Service is an interexchange service that allows interexchange carriers to connect to the local network for the purpose of originating or terminating calls.

6.1.2 Terms and Conditions

Rules, definitions, service offerings and terms and conditions of offering relating to the provision of access service may be found in the Olsen Thielen & CO., LTD, Tariff F.C.C. No. 1, files with the Federal Communication Commission, to which the Company concurs. (T)

6.1.3 Rates

	<u>Rates</u>		<u>Non-Recurring Charge</u>	
	<u>Originating</u>	<u>Terminating</u>		
A. <u>Common Line Access Service</u> Per MOU	.021458	.010729		
B. <u>Ordering Option Rates</u>				(N)
1. Service Date Change Charge			\$28.94	
2. Design Change Charge			\$62.52	
3. Access Order Charge			\$76.00	(N)
C. <u>Switched Rates</u>				
1. Local Switching Per MOU	.01147	.006722*		(M)
2. Local Transport				
a. Tandem Switching Per MOU	.002252*	.002252*		(N)
b. Tandem Switched Termination-Per MOU	.000447	.0003435*		(N)
c. Tandem Switched Facility Per MOU/Mile.	.000058	.0000440*		(N)

 6.1.3 Rates (cont'd)

(D)

(D)

		<u>Rates</u>		<u>Non-Recurring Charge</u>
		<u>Originating</u>	<u>Terminating</u>	
D.	Miscellaneous			(N)
	1. 800 Data Base Access Queries			
	1) Basic per Query	.003461		(N)
	2. End Office Shared Port	.003801	.002274*	(M)

The End Office Shared Port rate provides for the termination of common transport trunks in shared end office ports and in remote switching system or module (RSS or RSM) ports. The End Office Shared Port rate is assessed on a per-MOU basis to all trunkside originating and terminating access minutes utilizing tandem routing to an end office. If tandem routing is being utilized to a RSS or RSM (via a host office), the shared port rate is assessed to the access minutes originating or terminating from that RSS or RSM and is not assessed at the host office. If the customer has requested direct routing from the SWC to a RSS or RSM (via a host office), the End Office Shared Port rate is assessed to the access minutes originating or terminating from the RSS or RSM. This rate is in addition to the End Office Dedicated Trunk Port rate assessed for the dedicated trunk terminating in the host office as described below. The portcharge is not assessed to FGA or DA traffic.

	D. Miscellaneous (cont'd)			
	3. End Office Dedicated Trunk Port Per Trunk	\$26.34	\$16.17* (R)	(M)

The End Office Dedicated Trunk Port rate provides for termination of a trunk to a dedicated trunk port in an end office. The rate is assessed per month for each FG trunk in service (excludes FGA) directly routed (via DTT) between the SWC and the end office. The rate is not assessed to trunks directly routed to a DA location

SECTION 6 – ACCESS SERVICE

6.1 ACCESS SERVICE (Cont'd)

6.1.3 Rates (Cont'd)

C. Special Access

The Terms and Conditions relating to the provision of intrastate special access service mirror the Company's interstate tariff as filed with the FCC. Refer to Olsen Thielen & Co., LTD Tariff F.C.C. No.1. All Special Access Rates are on an individual case basis.

D. Other Access Arrangements

Rates for access services for which a rate is not specified in this tariff will be developed on an individual case basis.

GENERAL TARIFF AND PRICE LIST

---

SECTION 6 – ACCESS SERVICE

6.2 VOIP-PSTN TRAFFIC

6.2.1 Scope

- A. VoIP-PSTN Traffic is defined as traffic exchanged over the public switched telephone network (“PSTN”) facilities that originates and/or terminates in internet protocol (“IP”) format. This section governs the identification of VoIP-PSTN Traffic that, in the absence of an interconnection agreement, is required to be compensated at interstate access rates by the Federal Communications Commission in its Report and Order in WC Docket Nos. 10-90, etc., FCC Release No. 11-161 (Nov 18, 2011) (“FCC Order”). Specifically, this section establishes the method of separating such traffic (referred to in this tariff as “Relevant VoIP-PSTN Traffic”) from the customer’s traditional intrastate access traffic, so that such Relevant VoIP-PSTN Traffic can be billed in accordance with the FCC Order.
- B. This section will be applied to the billing of switched access charges to a customer that is a local exchange carrier only to the extent that the customer has also implemented billing of interstate access charge for Relevant VoIP-PSTN Traffic in accordance with the FCC Order.

6.2.2 Calculation and Application of Percent-VoIP Usage Factor

The Company will determine the number of Relevant VoIP-PSTN Traffic minutes of use (“MOU”) to which interstate rates will be applied under Scope, above, by applying a Percent VoIP Usage (“PVU”) factor to the total terminating intrastate access MOU received by the Company from the customer. The PVU will be derived and applied as follows:

- A. The customer will calculate and furnish to the Company a factor ( the “PVU”), along with supporting documentation, representing the whole number percentage of the customer’s total terminating intrastate access MOU that the customer exchanges with the Company in the State, that is sent to the Telephone Company and that originated in IP format. This PVU shall be based on information such as traffic studies, actual call detail, or other relevant and verifiable information.
- B. The Company will apply the PVU factor to the total terminating intrastate access MOU received from the customer to determine the number of Relevant VoIP-PSTN Traffic MOUs.
3. If the customer does not furnish the Company with a PVU pursuant to the preceding paragraph, the Company will utilize a PVU equal to zero.

GENERAL TARIFF AND PRICE LIST

---

SECTION 6 –ACCESS SERVICE

6.2 VOIP-PSTN TRAFFIC (cont'd)

6.2.3 Initial PVU Factor

If the PVU factor is not available and/or cannot be implemented in the Company's billing system by January 1, 2012, once the factor is available and can be implemented the Company will adjust the customer's bills to reflect the PVU retroactively to January 1, 2012. This retroactive adjustment will be made to January 1, 2012, provided that the customer provides the factor to the Company no later than April 15, 2012; otherwise it will set the initial PVU equal to zero, as specified in 6.2.2.C, above.

6.2.4 PVU Factor Updates

The customer may update the PVU factor quarterly using the method set forth in 6.2.2 above. If the customer chooses to submit such updates, the Company must receive PVU factor updates no later than 15 days after the first day of January, April, July and/or October of each year. A revised PVU factor is to be based on data for the prior three months ending the last day of December, March, June and September, respectively. The revised PVU factor will apply prospectively and serve as the basis for billing until superseded by a new PVU.

6.2.5 PVU Factor Verification

The Company may ask the customer to verify the furnished PVU factor no more than four times in any year. The customer, as requested, shall comply and shall reasonably provide the records and other information used to determine the PVU factors.

6.2.6 Rating of VoIP-0PSTN Traffic

The Relevant VoIP-PSTN Traffic identified in accordance with this tariff section will be billed at rates equal to the Company's applicable tariffed interstate switched access rates as specified in the Company's applicable federal access tariff, OLSEN THIELEN & Co.,LTD. Tariff F.C.C. No.1 tariff on file with the Federal Communications Commission and available on-line at: <https://apps.fcc.gov/etfs/public/browseLec.action?lecType=clec>

## STATE OF NORTH DAKOTA

### SUPPORTING DOCUMENTATION OF JULY 1, 2012 ACCESS TARIFF FILING

IdeaOne Telecom, Inc, Inc dba Enventis (IdeaOne) submits the following information in support of its revised state access tariff effective July 1, 2012. This filing provides the supporting documentation and description relating to the tariff preparation.

#### General Information

IdeaOne is a competitive carrier registered to provide service with the North Dakota Public Service Commission and does not participate in NECA pools.

IdeaOne's existing North Dakota Intrastate Access tariff is on file with the North Dakota Public Service Commission (PSC).

IdeaOne's existing InterState tariff is on file with the Federal Communications Commission (FCC) at <https://apps.fcc.gov/etfs/public/tariff.action?idTariff=564>.

#### Description of Filing Materials and Calculations

IdeaOne serves customers in the Fargo market which is also served by CenturyLink and other carriers.

IdeaOne's existing Intrastate access rates were set in 2000 and mirror those in effect for Qwest (nka CenturyLink) at that time.

IdeaOne's existing Interstate Access Rate mirrors that of CenturyLink.

IdeaOne uses Local Transport Restructured (LTR) format for the application of billed rate elements in its current Intrastate and Interstate tariffs and all intrastate rates are higher than the interstate rate elements, so the mapping for rate reductions as required in FCC 11-161 is a straightforward algebraic exercise so that the proposed rate filing is determined by the following logic:

IdeaOne Intrastate Originating rate element will continue at present levels, and

IdeaOne Intrastate Terminating rate element was reduced using the following formula:

$$(IdeaOne\ intrastate\ +\ interstate\ term\ rate)/2 = New\ IntraState\ Terminating\ Rate$$

Where IdeaOne's existing intrastate rates contained capacity based elements rather than MOU based elements, rates from the current CenturyLink tariff (circa 2003) were used as proxies for the existing rates for the purposes of this calculation.

IdeaOne is also filing a new rate for tandem switching which adopts the current CenturyLink interstate rate.

The rate conversion is further demonstrated on the attached worksheet displaying individual elements.
