EXTERNAL

Hello, Marsha

On Earl Olson's Site this is his Totals that did not make the year!

B.H.S. 1

C.B.S. 3

Crab Apple 1

Native Cottonwood 2

Clark Steinhaus

On the other site witch I forgot about that had,

Redosier Dogwood 20

Common Lilac 20

Armur Maple 15

Boxelder 14

Native Cottonwood 13

(he had his hired hand out there cleaning the trees and didn't see the end of the rows and went right over them)(that's why there is so many dead ones) (I think it was about the last 50 - 70 feet of each row)

Hi Justin,

Did you get a chance to put together the information?

Thanks,

Marsha Parlow

Marsha

I will be out of the office this morning!

But the tree site was really good we only had 7 trees die over the year I will have your numbers on what tree died when I return about 3p.m. today

Justin G. DeMarais

Importance: High

Hi Justin,

I will try calling you tomorrow morning too. The state is asking for a report on the tree survival. Could I get that ASAP?

Thanks,

Marsha Parlow

Hi Justin,

Did you have a chance to check the tree survival this past October?

Hi Justin,

Just following up. Have you had a chance to check survival on the trees?

Marsha

Hi Justin,

I hope all is going well for you! I thought I would drop you a line and see if you had a chance to check the survival of the trees planted last year.
