October 3, 2012

James R. Deutsch
Director
Reclamation Division

Dear Sir:

GMHR is in the process of purchasing 40 acres in Section 3 that is currently being reviewed by the public service commission for bond release to the Knife River Corporation in your letter dated September 18, 2012. The purpose for the purchase of this property is to construct a west bound WYE connection to the BNSF main line. The total amount of impact of the rail connection is approximately 3 acres.

GMHR is requesting permission to construct the rail connection across Section 3 to the BNSF Right-of-Way starting 10/15/12 as it will directly affect its current operations and continued business. The scheduled date of installation of the BNSF switch in their mainline Right-of-Way is the week of 10/29/12 thru 11/2/12. Is it possible that GMHR can complete the dirt work and sub-grade prep across Section 3 and not affect the decision process of the bond release for Knife River Corporation?

Your prompt attention in this matter would be greatly appreciated.

Sincerely,

William S. Pladson
