**Subject:** RE: Temporary Variance Permit Question

Shelly,

Three laminated copies of the variance permit are on-site, one for each scale location and one for the scale house. We apologize for the original placement of the variance and a copy was sent on to Montana Dakota Scale Services for their record.

thanks

**Subject:** Temporary Variance Permit Question

Good Afternoon Josh

On February 28, 2013, Montana Dakota Scale Service tested and approved the two scales located at Blaisdell Industrial Sand Terminal Project, Blaisdell, North Dakota. The reports indicate that no one was around to show the registered service person the variance.

The temporary variance permit issued on February 6, 2013 requires the variance permit be posted near the designated scale in a place conspicuous to the public.

Please confirm each variance permit has been posted near the designated scale.

If you have any questions, please contact me.

Thank you.
