10/6/2013

Dear North Dakota Public Service Commission,

We, Robert and Julie Sprague, owners of Sprague's Aerial Spraying Inc., are writing to inform you that we have exhausted our efforts to come to any agreement with Courtney Wind Farm and Geronimo Energy, and that we will not pursue any agreement relating to the wind towers that cause an unsafe obstruction in close proximity to our runway. We fully support our concerns stated on our July 18, 2013 letter to the North Dakota Public Service Commission. We ask that turbines 1, 2, 3, 10, 11, 12, 13, 21, 22, and permanent Met Tower B not be permitted.

After working closely with Courtney Wind Farm and Geronimo Energy, we have incurred significant attorney expenses, and feel that we have been subject to high pressure tactics and false promises.

Whatever the outcome of our situation we would like to commend the work of the North Dakota Public Service Commission. All the commissioners and staff have been positive, knowledgeable, and helpful. We feel that the North Dakota Public Service Commission is a great benefit to the residence of North Dakota.

Sincerely Yours,

Robert J. Sprague
Julie M. Sprague
