A certified check or a cashier's check must be drawn on the Bank of North Dakota or a federally insured, solvent bank. If, within ten days after notice of an award, the successful bidder should fail to execute a contract with the owner, then the surety will pay unto the owner for the use and benefit of the owner five percent (5%) of the bid or bids on the contract on which there is a default or the certified check or cashier's check of the bidder will be forfeited to the owner.

The Commission will retain the bid bonds, cashier's check or certified check of the three (3) lowest bidders until an award is made. Sec. 100	Project Objective
Sec. 200	Scope of Work
Sec. 300	Provisions
Sec. 400	Points of Approval
Sec. 500	Preservation of Survey Markers
Sec. 600	Utilization of Disadvantaged Business Enterprises

100. PROJECT OBJECTIVE

The objective of this project is the reclamation of an approximately 16 acre site as described in this IFB. This reclamation shall be achieved by excavation of spoil pile and backfilling of highwalls and pit as a result of an abandoned surface mine and other associated work. The requirements of this process are specified below.

200. SCOPE OF WORK

This project involves the backfilling of the pit and highwalls at an abandoned strip mine and the performance of other associated work items. It is estimated that approximately 198,000 cubic yards of excavation will be required to perform this work. This excavated material will be used, as shown on Plan Sheets, to backfill the highwalls and pit.

The Contractor is advised that most of this site is located within areas containing abandoned strip mine workings. The Contractor is required to understand that the excavation, backsloping, backfilling, and construction work specified in this IFB is inherently dangerous due to the presence of these unstable spoil piles, pits, highwalls and end walls. The Contractor is required to take the necessary precautionary steps to adequately protect workers and equipment used to complete this project.

The Contractor shall provide all material, equipment and personnel necessary to perform the work. The Contractor must be capable of completing this project within sixty (60) consecutive calendar days between approximately May 28, 2013 and July 26, 2013. Please note that no work will be allowed on holidays or weekends unless specifically approved by the Project Manager.

Standard Specifications for AML Reclamation Projects presented under separate cover are understood to be incorporated into this contract.

300. PROVISIONS

The following special provisions shall apply:

A. MOBILIZATION

1. **Scope of Work** – Mobilization consists of all necessary preparatory work and operations, which will enable the Contractor to start and finish the project. Mobilization includes movement of necessary items such as personnel, equipment, supplies, facilities and incidentals to and from the project site and any construction or dismantling. The Contractor shall determine the presence of any and all utility facilities within the project boundaries and notify all utility owners to appropriately mark the locations of these utility facilities.

The State of North Dakota has adopted a “One Call” utility locating Hot Line. The phone number is **1-800-795-0555** and the website is www.ndonecall.com.

The Contractor must furnish, install and maintain ample sanitary facilities for all workers. As the needs arise, a sufficient number of enclosed temporary toilets shall be conveniently placed as required by the sanitary codes of State and Local governments. All such facilities and services shall be furnished in strict accordance with existing and governing health regulations. Costs for furnishing, installing and maintaining sanitary facilities shall be included in the lump sum price bid for mobilization and no additional compensation will be allowed.

2. **Method of Measurement** – Mobilization must be measured on a lump sum (L.S.) basis, and shall not exceed ten percent (10%) of the total contract bid.
3. **Basis of Payment** – Payment for mobilization will be made according to the following schedule:
 - a) Upon mobilization of the equipment, materials and personnel needed to perform the requirements of this project, payment of eighty percent (80%) of the total mobilization shall be paid.
 - b) Upon demobilization of the equipment, materials and personnel needed to perform this project, payment of twenty percent (20%) of the total mobilization shall be paid.

B. TOPSOIL SALVAGE

1. **Scope of Work** – This item consists of removal, stockpiling and respreading of all available topsoil (and other good quality soil material) within the disturbed project site, as directed by the Project Manager. Available topsoil material shall be generally defined as approximately the top one foot of material; however, topsoil material thickness may vary in depth throughout the site.
2. **Construction Requirements** – Topsoil material shall be removed as directed and stockpiled into piles adjacent to working areas in the SW corner of the project. Stockpiles shall be located as not to interfere with any earthwork. The stockpiles shall be located as directed by the Project Manager. It is estimated that approximately 10,000 cubic yards of topsoil material will need to be removed, stockpiled and respread on the site. Removal of topsoil material shall be performed in a uniform and neat manner. Average stripping depth is estimated at one foot; however, actual field conditions may result in the removal of a greater or lesser depth of soil. The amount of material to be salvaged from any and all portions of the project site shall be determined in the field by the Project Manager. Topsoil material shall be put in stockpiles of uniform and neat dimensions to facilitate measurement of true volumes. Topsoil material removal must receive explicit approval from the Project Manager prior to the Contractor proceeding with other work items (see "Sec. 400").

Topsoil material removal areas will also be determined in the field by the Project Manager. Topsoil material shall be removed from all portions of the project area as completely as possible without mixing with poor quality material. Adjacent portions of the project area will also have topsoil material removed as directed by the Project Manager to facilitate in the final grading of the site.

Upon completion of the earthwork requirements of any given area (see C. "Earthwork"), the salvaged topsoil material must be respread to a uniform depth upon all the disturbed areas of the site. Please note all topsoil must be respread utilizing a scraper.

3. **Method of Measurement** – Stockpiled topsoil material will be measured by neat measurement as it lies within the stockpiles of each area. Measurement shall be made without regard to any actual or perceived swell that the material may experience. The topsoil stockpile surveying operations will be conducted by the Commission.
4. **Basis of Payment** – Payment will be made at the contract unit price for true volumes stockpiled. Such payment shall constitute full payment for all labor, materials, equipment and any other incidentals required to complete the work.

C. EARTHWORK

1. **Scope of Work** – This item consists of the excavation of earthen materials from the spoil pile and the backfilling of the highwalls and filling of the pit as shown on Plan Sheets 2 of 4 through 4 of 4 and as described herein.
2. **Construction Requirements** – The spoil pile, pit and highwalls shall be backfilled so as to leave a ground surface with the approximate configuration of that shown on the Plan Sheets. The cut and fill depths are shown on Plan Sheet 4 of 4. The backfill material is classified as uncompacted fill.

Spoil pile areas within the cut area shall be lowered to the elevation of that shown on the Plan Sheets.

A total of 198,000 cubic yards of earthen material must be removed from existing spoil pile areas, as shown on Plan Sheet 2 of 4, to achieve a desired slope. The excavated material must be moved to the pit and utilized as backfill material to achieve the desired post-reclamation topography of that shown on Plan Sheet 3 of 4.

Haul distances will vary and the Contractor shall be familiar with the volume of material to be placed in the pit.

The spoil material to be excavated is classified as common excavation. The material to be moved has varying amounts of rock, gravel, sand, silt and clay with differing moisture contents. Please note that no extra payment will be made for rock that is moved into the pit and highwall fill areas. Also note that no extra payment will be made for any muddy or wet conditions encountered in the cut or fill areas. Any waste (garbage) found on or within the spoil piles or pits must be properly buried or disposed. No extra payment will be made for the waste.

Please note that a total volume of 198,000 cubic yards of material has been calculated to be excavated and that no volume overruns will be allowable or paid for unless specifically approved by the Project Manager.

3. **Method of Measurement** – The spoil pile cut areas will be surveyed to assure they are cut to the planned post-reclamation grade. The surveying operations will be conducted by the Commission.
4. **Basis of Payment** – Payment will be made at the contract unit price. Such payment shall constitute full payment for all labor, materials, equipment and any other incidentals required to complete the work.

D. FERTILIZING AND SEEDING

1. **Scope of Work** – This item consists of fertilizing and seeding of all disturbed areas of the site as directed by the Project Manager, including but not limited to, the final graded spoil pile, pit and highwall areas, and any other disturbed areas of the site located within NW1/4, SW1/4 of Section 27, T135N, and R96W.
1. **Construction Requirements** – The fertilizer must be applied as directed by the Project Manager. It is estimated that approximately 16 acres will require fertilizer. The fertilizer must be applied at a rate of 70 pounds per acre Nitrogen and 20 pounds per acre Phosphorus.

Seeding must be performed upon all areas of the site as required by the "AML Standard Specifications", Sec. 205 and according to the seed mixtures listed below. No change shall be made to the specified seed mixtures without permission from the Project Manager. Approximate surface area to be seeded is estimated to be 16 acres. A firm seedbed must be prepared immediately following any earthwork or topsoil respreading operations. The soil must be prepared utilizing the following techniques: blading with motorgrader (both north/south and east/west directions) and chisel-plowing or disking to initially break up clods and work the soil, rock-picking, if required by the Project Manager and final light disking or harrowing (or the use of a drag). Seeding must be performed along the contour utilizing a grass seed drill and drilled to a depth of one-half inch. The source of seed must be from North Dakota or contiguous states i.e., Montana, South Dakota, or Minnesota.

2. **Method of Measurement** – Actual neat ground surface measurement shall be taken for each area to be fertilized and seeded. Measurement shall be made to the nearest 0.1 acre.
3. **Basis of Payment** – Payment will be made at the contract unit price. Such payment shall constitute full payment for all labor, materials, equipment and any other incidentals required to complete the work.

E. FORCE ACCOUNT

1. **Scope of Work** – The scope of work performed under this item consists of the provision of labor, equipment and material to undertake additional work that is not covered by specific bid items. For any force account work performed by a subcontractor, the Contractor will receive an additional allowance for administrative and overhead expenses. The additional allowance will be a percentage of the total force account invoice equal to ten percent of the first \$5,000 plus three percent of the balance in excess of \$5,000. The Project Manager reserves the right to procure force account services by the subcontractor of his choice. An example of force account work would be surveying done by an engineering firm.
2. **Method of Measurement** – Measurement shall be based on material quantities, equipment hours or other methods as determined by the Project Manager and agreed to by the Contractor. For subcontractor force account work, measurement shall be based on material quantities, equipment hours or other methods as determined by the Project Manager and agreed to by the subcontractor.

LABOR SURPLUS AREA CONCERNS**
PUBLIC SERVICE COMMISSION
ABANDONED MINE LANDS DIVISION
SFN 16755 (Rev. 12-99)

The requirements of this Special Provision will govern over any other contract provisions which may be in conflict or contrary thereto:

1. The Contractor agrees to use its best efforts to utilize minority or women-owned business enterprises (M/WBE) in the award of its subcontracts and in procuring supplies and materials to the fullest extent consistent with the efficient performance of its contract. As used in this contract, the term "minority or women-owned business enterprise" means a business, at least 51 percent of which is beneficially-owned and controlled by minority groups or women or, in the case of publicly-owned businesses, at least 51 percent of the voting interest and 51 percent of the beneficial ownership interests are held by minority groups or women. For the purpose of this definition, minority means a person who is Black, Hispanic, Asian American, American Indian, or Alaskan Native. Attached to this IFB is a list of M/WBE Contractors and Suppliers certified in North Dakota as a reference source for bidders. Bidders are in no way limited to this M/WBE list for subcontracting opportunities to M/WBE Contractors.
2. The Contractor agrees to establish and conduct an affirmative action program to ensure that minority or women-owned business enterprises will have an equitable opportunity to compete for subcontracts and furnishing of supplies. In this regard, the contracts shall:
 - a. Designate a liaison officer who will administer the Contractor's M/WBE Program.
 - b. Give adequate and timely consideration to the capabilities of known minority or women-owned business enterprises.
 - c. Ensure that known minority or women-owned business enterprises will have equal opportunity to compete for subcontracts, particularly by arranging solicitations, time for the preparation of bids, quantities, specifications, and delivery schedules.
 - d. Maintain records showing (1) procedures which have been adopted to comply with the policies set forth in this clause, including the establishment of a source list of minority or women-owned business enterprises, (2) awards to minority or women-owned business enterprises on the source list, and (3) specific efforts to identify and award subcontracts to minority or women-owned business enterprises.
 - e. Include this special provision "UTILIZATION OF MINORITY OR WOMEN-OWNED BUSINESS ENTERPRISES" with certifications in all subcontracts.
 - f. Cooperate with the State in any studies and surveys of the Contractors' minority or women-owned business enterprises procedures and practices that the State may conduct from time to time.
 - g. Submit periodic reports with respect to the records referred to in subparagraph (d) above, in such form and manner and at such times (not more often than quarterly) as the State may prescribe.
3. The Contractor agrees to use its best efforts to utilize labor surplus area firms in the award of subcontracts. The term "labor surplus area" means a geographical area identified by the Department of Labor as an area of concentrated unemployment or underemployment or an area of labor surplus.
