VIA OVERNIGHT MAIL

June 6, 2013

Mr. Darrell Nitschke  
Executive Secretary  
North Dakota Public Service Commission  
State Capitol  
600 East Boulevard Avenue, Twelfth Floor  
Bismarck, ND 58505-0480

Re: North Dakota Intrastate Access Group  
North Dakota Tariff No. 1

Dear Mr. Nitschke:

John Staurulakis, Inc. (“JSI”) files the enclosed tariff material on behalf of North Dakota Intrastate Access Group North Dakota Tariff No. 1 issuing carriers (“issuing carriers”) listed at Appendix A. Proposed revisions are made in compliance with current Federal Communications Commission (“FCC”) rules governing intercarrier compensation. The proposed revisions bear an effective date of July 1, 2013. An original and six (6) copies are provided as well as an electronic copy.

The initial Intrastate Access Group North Dakota Tariff No. 1 was filed effective July 1, 2012 and reflected FCC rules pursuant to the FCC’s ICC Reform Order.<sup>1</sup> Subsequent to the 2012 filing, the FCC revised intercarrier compensation rules relating to the transition of intrastate switched access rates.<sup>2</sup> For the July 1, 2013 transition, all LECs must match the interstate rate structure (local transport restructure “LTR”) and LECs who reduced rates in 2012 must exactly match the federal access tariff rate level for the affected terminating switched access rate elements. Further, NECA interstate switched access rates increased effective January 1, 2013, thereby increasing the capped rates which the issuing carriers

**Page 2**

must match for terminating access by July 1, 2013.<sup>3</sup> The issuing carrier rate tables established in 2012 to provide for the rate transition period through the year 2020 reflect proposed revisions resulting from these revised FCC rules and increased NECA switched access rates.

The result of the FCC rule change and the NECA rate increase is that many of the terminating access rates for 2013 to 2020 are higher than the rates filed in the tables last year. Four of the carriers reduced state terminating access rates in 2012 and now exactly match the NECA tariff rates. The one carrier's rates are slightly lower than NECA rates because the resulting revenue would be higher than the existing state access rates. In addition, the table shows the reduction of the local switching rate and information surcharge as a single combined rate on a separate line this year. This reduction is as outlined in the FCC rules.

All issuing carriers propose moving to Local Transport Restructure ("LTR") for terminating access rates. Originating access rates remain non-LTR.

Regulations are proposed to establish an Adjustment Factor to determine Percentage of Interstate Use applicable to mixed jurisdiction and rate structure.

Any questions regarding the filing may be directed to the undersigned at the address and telephone number listed above, or by email at [vwimer@jsitel.com](mailto:vwimer@jsitel.com).

Sincerely,

*/s/ Valerie Wimer*

Valerie Wimer  
Vice President

on behalf of  
North Dakota Intrastate Access Group

**ACCESS SERVICE**

2. General Regulations (Cont'd)

2.3 Obligations of the Customer (Cont'd)

2.3.10 Jurisdictional Report and Certification Requirements (Cont'd)

(A) Jurisdictional Reports - Switched Access (Cont'd)

(1) Percentage of Interstate Use (PIU)

(b) (Cont'd)

In cases where terminating state access is Local Transport Restructure (“LTR”) and originating access is non-Local Transport Restructure (“non-LTR”), there will be an additional adjustment factor applied to the flat rated Entrance Facilities, Direct Trunked Transport Facilities and Switched Access Service Optional Features and Functions. The adjustment factor will reduce the flat rated element by the percent of originating intrastate traffic flowing over the flat rated facility (“Adjustment Factor”). The Adjustment Factor shall be provided by the customer or developed by the Telephone Company as set forth in subsection (2), below.

(N)

(N)

**ACCESS SERVICE**

2. General Regulations (Cont'd)

2.3 Obligations of the Customer (Cont'd)

2.3.10 Jurisdictional Report and Certification Requirements (Cont'd)

(A) Jurisdictional Reports - Switched Access (Cont'd)

(2) Use of PIU Factors (Cont'd)

The Telephone Company developed PIU factor(s) described in this section will only be used for minutes of use for which the Telephone Company does not have sufficient call detail to determine the jurisdiction until such time as the customer provides updated PIU factor(s) for these services.

- (b) Separate PIUs are required for flat rated Entrance Facilities, Direct Trunked Transport Facilities, and Switched Access Services Optional Features and Functions. The PIU factor(s) for use with such flat rated elements will reflect the combination of originating and terminating traffic of all services using such facilities.

If the customer fails to provide a PIU factor on its order for service, the Telephone Company will apply the PIU factor it developed pursuant to Section(2)(a), above, against the customer's flat rated Switched Access Services to apportion those charges between the jurisdictions.

When the terminating intrastate access is LTR and originating access is non-LTR, the Telephone Company shall develop an Adjustment Factor to reduce the intrastate flat rate elements by the percent of originating intrastate usage. The Telephone Company will calculate the Adjustment Factor by measuring the intrastate originating and intrastate terminating minutes generated by the Customer over a three month period. The Adjustment Factor shall be the ratio of originating intrastate minutes divided by the total number of intrastate minutes of the customer expressed in a whole percentage. The Adjustment Factor shall be calculated by the Telephone Company annually unless the Customer provides an adjustment factor.

- (c) The term group shall be construed to mean single lines or trunks as well. For all groups the number of access minutes (either measured or assumed) for a group will be multiplied by the projected interstate percentage to develop the interstate access minutes. The number of access minutes for the group minus the developed interstate access minutes for the group will be developed intrastate access minutes.

2. General Regulations (Cont'd)

2.3 Obligations of the Customer (Cont'd)

2.3.10 Jurisdictional Report and Certification Requirements (Cont'd)

(A) Jurisdictional Reports - Switched Access (Cont'd)

(2) Use of PIU Factors (Cont'd)

- (d) When a customer orders Directory Assistance Service, the customer shall, in its order, provide the projected interstate percentage for terminating use.
- (e) When the customer has both interstate and intrastate Operator Services traffic, the percentage interstate usage determined for the customer's FGC or FGD service will be applied to the customer's Operator Services charges.
- (f) For each service, the customer may only provide a PIU factor that is in a whole number format, i.e., a number from 0 to 100. When the customer provides the PIU factor, the Telephone Company will subtract the provided PIU from 100 and the difference is the percent intrastate usage. The sum of the interstate and intrastate percentages will equal 100 percent. The customer provided factors will be used by the Telephone Company as described in Section (1)(b), above, until the customer provides updated PIU factors as required in (2)(g) or (h), below.

(M)

(M)

For flat rated elements that require an Adjustment Factor, intrastate elements shall be calculated as follows:

(N)

- (i) When the customer provides the PIU factor, the Telephone Company will use the inverse of the PIU as the percent intrastate.
- (ii) The intrastate amount is calculated by multiplying the intrastate flat rate by the percent intrastate.
- (iii) The Adjustment Factor shall then be applied to the intrastate billed amount to determine the reduction from the intrastate amount.
- (iv) The amount due from the Customer shall equal the intrastate amount minus the reduction from the Adjustment Factor.
- (g) When the customer adds or discontinues Busy Hour Minutes of Capacity (BHMC) lines or trunks to an existing Switched Access Service group, the customer shall furnish a revised projected interstate percentage for the remaining BHMC, lines or trunks in the end office group. The revised report will serve as the basis for future billing, where applicable, and will be effective on the next bill date. No prorating or back billing will be done based on such revised report.

(N)

**ACCESS SERVICE**2. General Regulations (Cont'd)2.3 Obligations of the Customer (Cont'd)2.3.10 Jurisdictional Report and Certification Requirements (Cont'd)(A) Jurisdictional Reports - Switched Access (Cont'd)(4) Disputes Involving Jurisdictional Reports – Switched Access

- (a) If a billing dispute arises or if a regulatory commission questions the projected PIU factor(s) or Adjustment Factor provided by the customer, the Telephone Company may, by written request, require the customer to provide the data the customer used to determine the projected PIU factor(s). This written request will be considered the initiation of the audit. The customer shall supply the data to an independent auditor or the Telephone Company within thirty (30) days of the Telephone Company request. The customer shall keep records of call detail from which the percentage of interstate and intrastate use can be ascertained as set forth in subsection (3), above, and upon request of the Telephone Company make the records available for inspection at an agreed upon location during normal business hours as reasonably necessary for purposes of verification of the percentages. The Telephone Company will audit data from one quarter unless a longer period is requested by the customer and agreed to by the Telephone Company. (C)
- (b) If the customer does not provide the requested data to the Telephone Company or independent auditor within thirty (30) days of the notice of audit, the customer will be in violation of the Tariff and subject to the provisions specified in Section 2.1.8(A), preceding.
- (c) Audits may be conducted by: (1) the Telephone Company when the customer agrees; (2) an independent auditor under contract to the Telephone Company; (3) a mutually agreed upon independent auditor paid for equally by the customer and the Telephone Company; or (4) an independent auditor selected and paid for by the customer. If the customer selects option (4), where it pays for its own independent audit, the selected auditor must certify that the audit was performed following Commission procedures for measuring interstate traffic as established by Commission Order, and provide the Telephone Company a report with supporting documentation to verify such procedures.

**ACCESS SERVICE**2. General Regulations (Cont'd)2.3 Obligations of the Customer (Cont'd)2.3.10 Jurisdictional Report and Certification Requirements (Cont'd)(A) Jurisdictional Reports - Switched Access (Cont'd)(4) Disputes Involving Jurisdictional Reports – Switched Access  
(Cont'd)

(d) Verification audits may be conducted no more frequently than once per year except in extreme circumstances. The Telephone Company and customer will attempt to limit the audit to a reasonable time to effectively complete the audit. The Telephone Company and customer shall respond promptly to requests generated during the audit to ensure timely completion of the audit.

(e) When a PIU or Adjustment Factor audit is conducted by the Telephone Company or an independent auditor under contract to the Telephone Company, the audit results will be furnished to the customer by Certified U.S. Mail. When a PIU audit is conducted by an independent auditor selected by the customer, the audit results will be furnished to the Telephone Company by Certified U.S. Mail. The Telephone Company will adjust the customer's PIU based upon the audit results. The PIU resulting from the audit shall be applied to the customer's usage for the quarter the audit is completed, the usage for the quarter prior to the completion of the audit, and the usage for the two (2) quarters following the completion of the audit. After that time, the customer may report revised PIU pursuant to Section (2)(g) or (h), above. If the revised PIU submitted by the customer represents a deviation of 5 percentage points or more from the audited PIU, and that deviation is not due to identifiable reasons, the provisions in Section (4)(a), above, may be applied. (C)

(f) Both credit and debit adjustments will be made to the customer's interstate access charges based on the audit results for the specified periods to accurately reflect the interstate usage for the customer's account consistent with Section 2.4.1, following.

**ACCESS SERVICE**2. General Regulations (Cont'd)2.3 Obligations of the Customer (Cont'd)2.3.10 Jurisdictional Report and Certification Requirements (Cont'd)(A) Jurisdictional Reports - Switched Access (Cont'd)(4) Disputes Involving Jurisdictional Reports – Switched Access  
(Cont'd)

- (g) If, as a result of an audit conducted by an independent auditor, a customer is found to have over-stated its PIU(s) or Adjustment Factor by 10 percentage points or more, the Telephone Company shall require reimbursement from the customer for the cost of the audit. Such bill(s) shall be due and paid immediately with available funds within 30 days from receipt and shall carry a late payment penalty as set forth in Section 2.4.1, following, if not paid within the 30 days. (C)

2.3.11 Determination of Interstate Charges for Mixed Interstate and Intrastate Switched Access Service

When mixed interstate and intrastate Switched Access Service is provided, all charges (i.e., nonrecurring, monthly and/or usage) including optional features charges, will be prorated between interstate and intrastate. The PIU factor(s) provided by the customer or developed by the Telephone Company as set forth in Section 2.3.10(C)(2), preceding, will serve as the basis for prorating the charges unless the Telephone Company is billing according to sufficient call details as set forth in Section 2.3.10(C)(1)(b), preceding. The percentage of an Access Service to be charged as interstate is applied in the following manner:

(A) Monthly and Nonrecurring Charges

For monthly and nonrecurring chargeable rate elements, multiply the percent interstate use times the quantity of chargeable elements times the stated tariff rate per element.

(B) Usage Sensitive Charges

For usage sensitive (i.e., access minutes and calls) chargeable rate elements, multiply the percent interstate use times actual use (i.e., measured or Telephone Company assumed average use) times the stated tariff rate.
