Re: Compliance Filing
Great Plains Natural Gas Co. (Case No. PU-13-551)

On October 31, 2013, the commission received a compliance filing from Great Plains Natural Gas Co. to remove the Highway 13 surcharge adjustment from its tariffs as approved by the commission on October 9, 2013. The tariff revisions are straightforward and no formal approval was deemed necessary. Great Plains eliminated the surcharge on and after November 1, 2013.

On October 9, 2013, the commission also approved converting Great Plains' billing units from MCF's to DK's. However, it was discovered that the conversion calculation was wrong. Therefore, MDU will file a corrected conversion factor by the end of the year for staff review. A new motion will be prepared after staff is satisfied with the new calculation.
