

**STATE OF NORTH DAKOTA  
PUBLIC SERVICE COMMISSION**

**Montana-Dakota Utilities Co. / Otter Tail Power Company  
345 kV Transmission Line – Dickey County  
Siting Application**

**Case No. PU-13-840**

**SUPPLEMENTAL ORDER**

**December 16, 2015**

On July 10, 2014, the Commission issued Corridor Certificate No. 154 and Route Permit No. 166 to Montana-Dakota Utilities Co., a Division of MDU Resources Group, Inc. and Otter Tail Power Company (Applicants) authorizing approximately 11 miles of 345 kV electric transmission line and associated facilities from a new Ellendale 345 kV substation to the South Dakota Border in Dickey County. This is the North Dakota portion of an Ellendale to Big Stone project.

On September 29, 2015, Applicants filed an application for amended corridor certificate and route permit, requesting minor corridor and route modifications in sections 9 & 10 of Ellendale Township T129N, R63W and in Section 32 of Van Meter Township T129N, R62W.

On November 4, 2015 the Commission found the application complete and issued a Notice of Opportunity for hearing, which provided until December 8, 2015 for receiving written comments or hearing requests. No response was received. The notice identified the following issues to be considered:

1. Will the location, construction, and operation of the proposed facilities produce minimal adverse effects on the environment and upon the welfare of the citizens of North Dakota?
2. Are the proposed facilities compatible with the environmental preservation and the efficient use of resources?
3. Will the proposed facility locations minimize adverse human and environmental impact while ensuring continuing system reliability and integrity and ensuring that energy needs are met and fulfilled in an orderly and timely fashion?

On November 27, 2015 the North Dakota Department of Health comments stating that it believes environmental impacts from the proposed construction will be minor and can be controlled by proper construction methods.

No impact is anticipated on any exclusion or avoidance area. The State Historical Society of North Dakota reviewed the proposed reroutes and concurred with a determination of no historic properties affected.

The location, construction, and operation of the proposed facilities will produce minimal adverse effects on the environment and upon the welfare of the citizens of North Dakota.

The proposed facilities are compatible with the environmental preservation and the efficient use of resources.

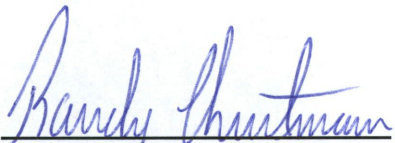

The proposed facility locations will minimize adverse human and environmental impact while ensuring continuing system reliability and integrity and ensuring that energy needs are met and fulfilled in an orderly and timely fashion.

The proposed project is of such design, location, and purpose that it will produce minimal adverse effects.

**Order**

The Commission Orders First Amended Certificate of Corridor Compatibility No. 154 and First Amended Route Permit No. 166 are issued to Applicants authorizing the proposed route and corridor modifications.
