I received a call from Lorinda Haman at the McHenry County Weed Board on August 20, 2013. Ms. Haman was responding to the consultation letter sent on July 1 regarding Enbridge’s request for information related to locations of known noxious and invasive weeds, as well as any recommendations regarding treatment of weeds prior to and during construction activities.

Ms. Haman indicated they have no formal system for tracking weeds. She was unclear if Enbridge was asking for the county weed board to go out and identify the weed locations. I assured her that we were not, but indicated if they did know where weeds are or have thoughts on how to handle them Enbridge would like to have that information to include for construction planning. I told her that we would send her pdf 11x17 maps they could mark up to indicate known concentrations.
