

Figure 1. Boundaries of the UND Oakville Prairie Field Station are not listed on the Enbridge "Avoidance Areas" documentation (p. 59 of Exhibit 12) and ownership is inappropriately listed as ND Department of Trust Lands. UND has submitted a federal grant proposal (pending: NG State Wildlife Grant funded through the USFWS) to implement a long-term management and research plan on the site which has been under UND management as a research and education facility since 1963. Documentation of the animal, plant, and invertebrate species at the site can be made available upon request.
