Re: AT&T Corp. Local Residential Exchange Service Tariff

Dear Ms. Jeffcoat-Sacco:

Enclosed for filing is a revision to the Local Residential Exchange Service Tariff for AT&T Corp. The purpose of this filing is to remove language addressing 911 Overflow to Operators.

The following page of AT&T Corp.'s Price Schedule is enclosed:

<u>Section</u>	<u>Page Number</u>	<u>Revision</u>
2	21	First

No customer notice is required for this action.

AT&T requests a filing date of December 19, 2013 and an effective date of December 20, 2013.

Please contact me if you have any questions or concerns at (303) 299-5703.

Sincerely,

Jon Blessing

SECTION 2
1ST REVISED PAGE 21

ISSUED: DECEMBER 19, 2013

EFFECTIVE: DECEMBER 20, 2013

2. GENERAL REGULATIONS

2.11 EMERGENCY NUMBER SERVICE (ENS)

This tariff provides for Emergency Number Service (911 Service), which is an arrangement of Company Central Office and trunking facilities whereby a user who dials the telephone number "911" will reach the emergency report center for the telephone from which the number is dialed. The telephone user who dials the 911 number will not be charged for the call. (C)

Both 911 and E911 service are only available from Company switching facilities (where available) and via Company services that are equipped to provide and that do provide 911 or E911 service. The Company shall provide to the PSAP only such name, address and telephone number information as the Customer shall provide to the Company, and for any 911 or E911 call, the Company shall only pass to the PSAP such information, including ALI and/or ANI data, as the Customer's facilities, network or station equipment shall make properly available to the Company's network and equipment for transmission to the PSAP.

Universal Emergency Number Service (911) is a telephone exchange communications service whereby a Public Safety Answering Point (PSAP) serving the Customer's location may receive telephone calls dialed to the telephone number "911" from service users within a 911 service district.

Two types of 911 services are offered: Basic 911 (911) and Enhanced 911 Service (E911).

- a. Basic 911 Service: provides for routing all 911 calls originated by telephones having telephone numbers beginning with a given central office prefix code or codes to a single PSAP equipped to receive those calls.
- b. Enhanced 911 Service provides additional features, such as selective routing of 911 calls to a specific PSAP and Automatic Number Identification.

The 911 calling party waives the privacy afforded by non-listed and non-published service to the extent that the telephone number, address and name associated with the originating access line location are furnished to the PSAP.

The Company will not provide both Basic 911 and Enhanced 911 Service within a given central office (switching entity).

The Company does not undertake to answer and forward 911 calls, but furnishes the use of its facilities to enable the service users to have the ability to access the PSAP.
