RE: Reclamation Update PU-14-135

Dear Sara

In your letter dated November 22, 2016 you noted some concern regarding an influx of weeds on the above captioned project ROW. While Houston Engineering was not clear in where those concerns were located Belle Fourche has continued to treat the project area supplementing the weed spraying at about the time of the HEI inspection in July of 2016 with additional treatments this spring.

Absent good location information, I am unable to provide pictures documenting successful reclamation at the location of concern. However, as of this writing, I am happy to inform you that our review of the entire right of way indicates that project reclamation is complete and successful.

Feel free to contact me directly at 307-266-0275, if you need any further information or if you have any questions.

Sincerely,

Ken Dockweiler
Director Land Government and Compliance
