Logan County Wind Farm 10 Year Plan
No Changes have been made to the 2013 10 Year Plan.

Mr. Nitschke,

Sorry for the late filing of this Letter, however, we moved our office due to the building being sold, and in the process, forgot to file this letter. Even though it has been sometime since we started this whole process, we believe we are finally going to be able to build our wind farm. We will know by the end of this month. So, with that being said, we look forward to the support of the PSC as for us it has been a long process. Thank you.

As of now, there are no changes to the 10 Year Plan of 2013. However, there might be some revisions of the original plan based on a turbine selection. The general footprint will be the same. We will have fewer turbine locations due to a larger turbine size. All this information will be provided for the review of the PSC once our financing is in place, and we are looking to start the project. Our turbine sites will not change for the most part, however, due to some FAA findings, we have and or will eliminate some sites.

If there is anything you need from us, please let me know, again, thank you, and we look forward to working with you soon.

Jeffrey L. Metzger
