

October 31, 2014

**HAND DELIVERED**

Mr. Darrell Nitschke  
Executive Secretary  
North Dakota Public Service Commission  
600 East Boulevard Avenue, Dept. 408  
Bismarck, ND 58505-4080

**RE: Caliber Midstream Partners, L.P. —  
Case Number PU-14-689  
Request for Supplemental Information**

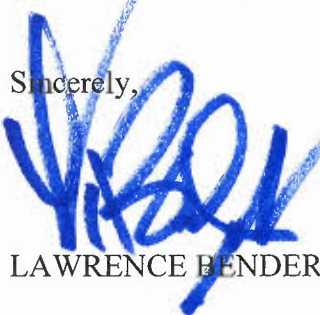

Dear Mr. Nitschke:

This letter is in follow up to a request received from your office for supplemental agency correspondence in support of Caliber Midstream Partners, L.P.'s ("Caliber") Consolidated Application for Certificate of Corridor Compatibility and Route Permit.

Please find enclosed for filing an original and ten (10) copies of agency correspondence providing notification of the project. No agency questions or comments were immediately provided in response. In the event any such agency response is received, this information will be filed with the Commission.

Also enclosed is a CD containing the above-referenced documents in PDF format. If you have any questions, please advise.

Sincerely,

LAWRENCE BENDER

**Subject:** Caliber Midstream - 4.4 mile NGL pipeline project  
**Attachments:** Caliber\_NGL\_BW.PDF

Dear Ms. Perusich,

Thank you for speaking with me earlier today. As a follow-up to our conversation, please review the following information, and let me know if you have any questions or comments.

Caliber Midstream Partners (Caliber) has submitted applications to the North Dakota Public Services Commission (PSC) for a Route Permit and Certificate of Corridor Compatibility associated with a 4.4-mile-long, 6 inch-diameter natural gas liquids (NGL) pipeline (Project) in McKenzie County, North Dakota. In accordance with PSC guidelines, this email is to notify you of the Project and respectfully request that you submit any questions or comments by November 5, 2014. Any comments or questions submitted by this date will be provided to the PSC and addressed during the scheduled public hearing on November 6, 2014.

The Project has been installed but is not operational. There are four additional pipelines (e.g., gathering and water pipelines) located within the same 100-foot right-of-way (ROW) as the Project. All five pipelines were constructed within one ROW because of agreements in place between Caliber and the seven private landowners affected by the Project. The agreements required Caliber to install all anticipated pipelines simultaneously within one ROW to minimize impacts to productive agricultural land. The pipeline was originally (at the time of installation) intended to be utilized for gas gathering from the well pads located along the route. When the gas transport deal failed to materialize from these well pads, it was decided to utilize the installed pipeline to transport NGLs from a nearby gas processing plant. Your office was not initially notified of the Project because at the time of the original disturbance the pipeline was intended as a regulatory exempt gas gathering line.

Attached is a map showing the Project location. For detailed information regarding the Project components and associated environmental studies, please refer to the PSC link below:

# North Dakota State Water Commission

## Anderson, Doug/DEN

---

**From:** Anderson, Doug/DEN  
**Sent:** Friday, October 31, 2014 8:53 AM  
**To:** 'lweispfenning@nd.gov'  
**Subject:** Caliber Midstream - 4.4 mile NGL pipeline project  
**Attachments:** Caliber\_NGL\_BW.PDF

Dear Ms. Weispfenning,

This email notification is to allow you or someone from North Dakota State Water Commission the opportunity to comment on a pipeline project in McKenzie County.

Caliber Midstream Partners (Caliber) has submitted applications to the North Dakota Public Services Commission (PSC) for a Route Permit and Certificate of Corridor Compatibility associated with a 4.4-mile-long, 6 inch-diameter natural gas liquids (NGL) pipeline (Project) in McKenzie County, North Dakota. In accordance with PSC guidelines, this email is to notify you of the Project and respectfully request that you submit any questions or comments by November 5, 2014. Any comments or questions submitted by this date will be provided to the PSC and addressed during the scheduled public hearing on November 6, 2014.

The Project has been installed but is not operational. There are four additional pipelines (e.g., gathering and water pipelines) located within the same 100-foot right-of-way (ROW) as the Project. All five pipelines were constructed within one ROW because of agreements in place between Caliber and the seven private landowners affected by the Project. The agreements required Caliber to install all anticipated pipelines simultaneously within one ROW to minimize impacts to productive agricultural land. The pipeline was originally (at the time of installation) intended to be utilized for gas gathering from the well pads located along the route. When the gas transport deal failed to materialize from these well pads, it was decided to utilize the installed pipeline to transport NGLs from a nearby gas processing plant. The North Dakota State Water Commission was not initially notified of the Project because at the time of the original disturbance the pipeline was intended as a regulatory exempt gas gathering line.

Attached is a map showing the Project location. For detailed information regarding the Project components and associated environmental studies, please refer to the PSC link below:

[http://psc.nd.gov/database/docket\\_file\\_list.php?s\\_dept=PU&s\\_company\\_name=Caliber+Midstream+Partners%2C+L.P.&s\\_year\\_case=14&s\\_seq\\_num=689&s\\_doc=1](http://psc.nd.gov/database/docket_file_list.php?s_dept=PU&s_company_name=Caliber+Midstream+Partners%2C+L.P.&s_year_case=14&s_seq_num=689&s_doc=1)

# US Fish and Wildlife Service

# Phone log

Contact name: Heidi Riddle, Fish and Wildlife Biologist, US Fish and Wildlife Service (USFWS)

---

Phone number: 701-250-4481

---

Date and time: July 1, 2014 10:35AM

---

## Call summary:

Katy Reagan (Sunbird Biological) and Heidi Riddle (USFWS) discussed the Caliber Midstream PSC project, wildlife issues related to oil and gas development in North Dakota, and project coordination with USFWS.

- USFWS had no comments regarding the Caliber Midstream PSC Project.
- USFWS recommends communicating with USFWS prior to construction.
- Be aware of crossing USFWS managed lands and communicate early with USFWS.
- Habitat assessment is first step for Dakota skipper (butterfly) presence/absence survey.
- Tree removal during project construction may have impacts on northern long-eared bat summer roosting habitat and documentation of the limited tree habitat in the area is important.
- Raptor nest surveys are a good idea in order to determine potential impacts to raptors (especially golden and bald eagles) from construction and operation of projects.
- Coordinate early in the planning process with USFWS. USFWS may provide recommendations for construction, operation, and maintenance of projects, as appropriate.

## Call summary:

Katy Reagan (Sunbird Biological) called Steve Dyke (NDGF) on July 1, 2014 regarding the Caliber PSC project, wildlife issues related to oil and gas development in North Dakota, and project coordination with NDGF. NDGF returned the call to Sunbird and left the following message:

- No comments specific to the Caliber Midstream PSC Project, especially since the Project has already been constructed.
- NDGF is usually contacted in advance of construction of a project.
- In coordination submittal to NDGF proponents should include a Project description and details (what is the project?), and construction details including timing such as when construction will take place and how long it will take. Also include a map (figure or shapefile).
- Usually takes NDGF 4-5 weeks for review and comment.
