

Hi,

We were working on this job as a sub under signature landscaped. They had called in the locate, ticket number 14111634.

I do not remember the events exactly as we install 300 yards a year.

I believe my foreman was installing, in a tight area, and did not pull up the trencher blade earlier enough and hit the gas line.

On a side note, we have been running into quite a few yards where excel is not located in time. We have been calling them and working with them to make sure these lines get located so we do not hit them. I do not feel it would be fair for me to receive a bill from excel and a fine in this instance, especially since we work with them when their lines are not located on time.

Thanks,

Joe Louwagie
