Pre-Construction Call for Construction of Little Missouri Gas Plant IV

Attendees:

From Targa Badlands LLC (the "Company")

David McQuade, Company coordinator/facilitator

Shirish Mehta, Project Manager

Rudy Salazar, Environmental

E3 Environmental

Katie Schmidt

North Dakota PSC Staff

Victor Schock

Minutes:

Victor started the meeting by asking if Targa has started construction on this project prior to notifying the commission and requesting the pre- construction conference as defined in North Dakota Century Code section 49-22.1-01. David and Shirish agreed that per the definition the company has already started construction. They further described the activities that have taken place thus far which include expansion of the Compressor building, building skirt walls, installing concrete piers and foundations, and moving equipment onsite.

Victor reviewed the Commission's Order item by item. Victor acknowledged a statement by David that no trees were anticipated to be disturbed by the project, but reminded the Company that if they were to disturb any during the course of construction, the Tree and Shrub certification document would apply.

Victor reviewed the certification document item by item, with further discussion of the following items:

Item No. 5: Victor reviewed the requirement for monthly construction updates. Shirish requested an example to ensure they are including the relevant details on the updates.

Item No. 30: Shirish noted that this item may be difficult to provide for given the type of facility. Victor agreed to provide Shirish with an example of a previous submission to show the level of detail necessary.

There being no further questions or discussion items, the call concluded.
