Re: Cost of Gas Adjustment
(COG) Rate 88 and 99
Case No. PU-15-008

In accordance with North Dakota Century Code Section 49-05-05, Montana-Dakota Utilities Co. (Montana-Dakota), a Division of MDU Resources Group, Inc., respectfully submits an original and two (2) copies of a Cost of Gas (COG) - Propane change pursuant to the terms of Rate 99.

Montana-Dakota will not seek a cost of gas (COG) adjustment change for the month of November 2015. The COG Adjustment tariff (Rate 88), Section 2(b) provides that "Montana-Dakota shall file to reflect changes in its average cost of gas supply only when the amount of change in such COG is at least 10 (ten) cents per dk." The COG adjustment for the month of November 2015 results in a change of less than 10 cents per dk, and therefore, in accordance with the authorized tariff, Montana-Dakota will not seek a COG adjustment change for the month of November.

Attachment A is the Rate Summary Sheet (142nd Revised Sheet No. 3) showing the proposed propane rates, to be effective with service rendered November 1, 2015.

Montana-Dakota purchases propane supplies from various wholesale suppliers. The cost of propane has increased since the last COG filing due to an increase in the market price of propane. Attachment B explains the reasons for the increase in the market price of propane.

Exhibit A, page 1 summarizes the cost of gas – propane calculated pursuant to the terms of Rate 99, which will apply during the month of November 2015. The net effect of this filing is an increase of \$0.879 per dk for all customers from the currently effective rates.

Exhibit A, page 2 shows the calculation of the current cost of gas – propane that will be applicable to Montana-Dakota's customers for the month of November 2015. The average cost of propane for all customers, adjusted for losses, is \$3.294 per dk.

This proposed adjustment, calculated in accordance with Rate 99, will amount to an increase of approximately \$2,900 for propane customers during the month of November 2015. All of Montana-Dakota's retail propane customers in North Dakota may be affected by this proposal. There were 344 propane customers in North Dakota as of September 30, 2015.

If you have questions regarding this filing, please contact me at (701) 222-7856 or tamie.aberle@mdu.com.

Please acknowledge receipt by stamping or initialing the duplicate copy of this letter attached hereto and returning the same in the enclosed self-addressed, stamped envelope.

Sincerely,

Tamie A. Aberle
Director of Regulatory Affairs

**Montana-Dakota Utilities Co.
Market Conditions for Regional Propane
November 2015**

Montana-Dakota uses two regional bulk wholesale propane suppliers for obtaining the lowest prices for Hettinger customers. Each time Montana-Dakota purchases propane, it requests a price quote from each supplier for a specific delivery date and quantity in truckloads, delivering 8,000 to 12,000 gallons. Montana-Dakota selects the lowest price, all other things being equal.

The November prices for propane have increased from the previous level. A change in the price of propane is generally driven by a combination of crude oil prices, weather, and demand and inventory levels. As seasonal usage increases it has resulted in an increase in the price of propane.

The Department of Energy's (DOE) Energy Information Administration (EIA) provides various publications on Energy issues. The information is available on their website:
