Subject: Say No to MDU's Rate Increase

Dear Randy Christmann,

I am a Montana Dakota Utilities (MDU) customer who is concerned about MDU's proposal to raise my natural gas rates. I am asking you to reject their proposal.

MDU's proposal is unfair to consumers like me. MDU should not be allowed to raise its fixed charge to \$21 per month. MDU just increased this same charge from \$9 to \$15 last year and now want another 40% increase in less than a year.

Even if I turn off every gas appliance in my home, I'd still owe MDU \$21 every month even if I'm not using any gas. The proposal gives customers like me less control over my bill and discourages conservation.

Additionally, the proposal does not increase rates for everyone, it exempts large commercial users and corporations at the expense of hardworking North Dakotans like me. Why isn't the increase shared by all of MDU's customers?

Finally, the proposal is egregious in how MDU proposes to guarantee its profits. The MDU proposal asks for a 10% revenue guarantee each of the next five years without a full rate review by the PSC if MDU's profit drops below 9.5% in a year. Additionally, MDU proposes to keep 50% of what they overcharge me if their profits exceed 10.5%.

As an elected board you have a responsibility to review all rate requests and should not allow the company to circumvent its need to prove increases are necessary. Further, if they overcharge me on my bill, how is it fair that I only get half of what I am overcharged back? That's not right or fair!

I encourage you to reject MDU's proposal to increase my natural gas rates. Enough is enough!!

Sincerely,  
Mr. Ralph Wyatt

Subject: Say No to MDU's Rate Increase

Dear Randy Christmann,

I am a Montana Dakota Utilities (MDU) customer who is concerned about MDU's proposal to raise my natural gas rates. I am asking you to reject their proposal.

MDU's proposal is unfair to consumers like me. MDU should not be allowed to raise its fixed charge to \$21 per month. MDU just increased this same charge from \$9 to \$15 last year and now want another 40% increase in less than a year.

Even if I turn off every gas appliance in my home, I'd still owe MDU \$21 every month even if I'm not using any gas. The proposal gives customers like me less control over my bill and discourages conservation.

Additionally, the proposal does not increase rates for everyone, it exempts large commercial users and corporations at the expense of hardworking North Dakotans like me. Why isn't the increase shared by all of MDU's customers?

Finally, the proposal is egregious in how MDU proposes to guarantee its profits. The MDU proposal asks for a 10% revenue guarantee each of the next five years without a full rate review by the PSC if MDU's profit drops below 9.5% in a year. Additionally, MDU proposes to keep 50% of what they overcharge me if their profits exceed 10.5%.

As an elected board you have a responsibility to review all rate requests and should not allow the company to circumvent its need to prove increases are necessary. Further, if they overcharge me on my bill, how is it fair that I only get half of what I am overcharged back? That's not right or fair!

I encourage you to reject MDU's proposal to increase my natural gas rates.

Sincerely,  
Miss paula Taylor

Subject: Say No to MDU's Rate Increase

Dear Randy Christmann,

I am a Montana Dakota Utilities (MDU) customer who is concerned about MDU's proposal to raise my natural gas rates. I am asking you to reject their proposal.

MDU's proposal is unfair to consumers like me. MDU should not be allowed to raise its fixed charge to \$21 per month. MDU just increased this same charge from \$9 to \$15 last year and now want another 40% increase in less than a year.

Even if I turn off every gas appliance in my home, I'd still owe MDU \$21 every month even if I'm not using any gas. The proposal gives customers like me less control over my bill and discourages conservation.

Additionally, the proposal does not increase rates for everyone, it exempts large commercial users and corporations at the expense of hardworking North Dakotans like me. Why isn't the increase shared by all of MDU's customers?

Finally, the proposal is egregious in how MDU proposes to guarantee its profits. The MDU proposal asks for a 10% revenue guarantee each of the next five years without a full rate review by the PSC if MDU's profit drops below 9.5% in a year. Additionally, MDU proposes to keep 50% of what they overcharge me if their profits exceed 10.5%.

As an elected board you have a responsibility to review all rate requests and should not allow the company to circumvent its need to prove increases are necessary. Further, if they overcharge me on my bill, how is it fair that I only get half of what I am overcharged back? That's not right or fair!

I encourage you to reject MDU's proposal to increase my natural gas rates.

Sincerely,  
Ms. Catherine Armstrong

The MDU proposal asks for a 10% revenue guarantee each of the next five years without a full rate review by the PSC if MDU's profit drops below 9.5% in a year. Additionally, MDU proposes to keep 50% of what they overcharge me if their profits exceed 10.5%.

As an elected board you have a responsibility to review all rate requests and should not allow the company to circumvent its need to prove increases are necessary. Further, if they overcharge me on my bill, how is it fair that I only get half of what I am overcharged back? That's not right or fair!

I encourage you to reject MDU's proposal to increase my natural gas rates.

Sincerely,  
Mr. tom fuller

Subject: Say No to MDU's Rate Increase

Dear Brian Kalk,

I am a Montana Dakota Utilities (MDU) customer who is concerned about MDU's proposal to raise my natural gas rates. I am asking you to reject their proposal.

MDU's proposal is unfair to consumers like me. MDU should not be allowed to raise its fixed charge to \$21 per month. MDU just increased this same charge from \$9 to \$15 last year and now want another 40% increase in less than a year.

Even if I turn off every gas appliance in my home, I'd still owe MDU \$21 every month even if I'm not using any gas. The proposal gives customers like me less control over my bill and discourages conservation.

Additionally, the proposal does not increase rates for everyone, it exempts large commercial users and corporations at the expense of hardworking North Dakotans like me. Why isn't the increase shared by all of MDU's customers?

Finally, the proposal is egregious in how MDU proposes to guarantee its profits. The MDU proposal asks for a 10% revenue guarantee each of the next five years without a full rate review by the PSC if MDU's profit drops below 9.5% in a year. Additionally, MDU proposes to keep 50% of what they overcharge me if their profits exceed 10.5%.

Subject: Say No to MDU's Rate Increase

Dear Brian Kalk,

I really cannot understand the rationale to raise the cost to our natural gas service when gas is still being wasted by continued flaring! If YOU believe that someone should do more . . . look at the oil companies who are burning an unreplaceable natural resource. All you have needed to do is put forth a regulation of NO MORE FLARING and our precious resource would be better utilized. This could and MUST be done before you take the easy approach and allow MDU to tack on another type of hidden "TAX" on the consumers bill! ENOUGH!

Subject: Say No to MDU's Rate Increase

Dear Randy Christmann,

I am a Montana Dakota Utilities (MDU) customer who is concerned about MDU's proposal to raise my natural gas rates. I am asking you to reject their proposal.

MDU's proposal is unfair to consumers like me. MDU should not be allowed to raise its fixed charge to \$21 per month. MDU just increased this same charge from \$9 to \$15 last year and now want another 40% increase in less than a year.

Even if I turn off every gas appliance in my home, I'd still owe MDU \$21 every month even if I'm not using any gas. The proposal gives customers like me less control over my bill and discourages conservation.

Additionally, the proposal does not increase rates for everyone, it exempts large commercial users and corporations at the expense of hardworking North Dakotans like me. Why isn't the increase shared by all of MDU's customers?

Finally, the proposal is egregious in how MDU proposes to guarantee its profits. The MDU proposal asks for a 10% revenue guarantee each of the next five years without a full rate review by the PSC if MDU's profit drops below 9.5% in a year. Additionally, MDU proposes to keep 50% of what they overcharge me if their profits exceed 10.5%.

As an elected board you have a responsibility to review all rate requests and should not allow the company to circumvent its need to prove increases are necessary. Further, if they overcharge me on my bill, how is it fair that I only get half of what I am overcharged back? That's not right or fair!

I encourage you to reject MDU's proposal to increase my natural gas rates.

Sincerely,  
Mr. David Schaff

Subject: Say No to MDU's Rate Increase

Dear Randy Christmann,

I am a Montana Dakota Utilities (MDU) customer who is concerned about MDU's proposal to raise my natural gas rates. I am asking you to reject their proposal.

MDU's proposal is unfair to consumers like me. MDU should not be allowed to raise its fixed charge to \$21 per month. MDU just increased this same charge from \$9 to \$15 last year and now want another 40% increase in less than a year.

Even if I turn off every gas appliance in my home, I'd still owe MDU \$21 every month even if I'm not using any gas. The proposal gives customers like me less control over my bill and discourages conservation.

Additionally, the proposal does not increase rates for everyone, it exempts large commercial users and corporations at the expense of hardworking North Dakotans like me. Why isn't the increase shared by all of MDU's customers?

Finally, the proposal is egregious in how MDU proposes to guarantee its profits. The MDU proposal asks for a 10% revenue guarantee each of the next five years without a full rate review by the PSC if MDU's profit drops below 9.5% in a year. Additionally, MDU proposes to keep 50% of what they overcharge me if their profits exceed 10.5%. And why should we guarantee them a profit. They are a monopoly. They own or a part of many other companies. When I invest in the stock market, I wish that a governmental agency would guarantee me a profit on my investment.

As an elected board you have a responsibility to review all rate requests and should not allow the company to circumvent its need to prove increases are necessary. Further, if they overcharge me on my bill, how is it fair that I only get half of what I am overcharged back? That's not right or fair!

I encourage you to reject MDU's proposal to increase my natural gas rates or are you being bought off by MDU.

Sincerely,  
Mr. Alfred Buchholz

I am a Montana Dakota Utilities (MDU) customer who is concerned about MDU's proposal to raise my natural gas rates. I am asking you to reject their proposal.

MDU's proposal is unfair to consumers like me. MDU should not be allowed to raise its fixed charge to \$21 per month. MDU just increased this same charge from \$9 to \$15 last year and now want another 40% increase in less than a year.

Even if I turn off every gas appliance in my home, I'd still owe MDU \$21 every month even if I'm not using any gas. The proposal gives customers like me less control over my bill and discourages conservation.

Additionally, the proposal does not increase rates for everyone, it exempts large commercial users and corporations at the expense of hardworking North Dakotans like me. Why isn't the increase shared by all of MDU's customers?

Finally, the proposal is egregious in how MDU proposes to guarantee its profits. The MDU proposal asks for a 10% revenue guarantee each of the next five years without a full rate review by the PSC if MDU's profit drops below 9.5% in a year. Additionally, MDU proposes to keep 50% of what they overcharge me if their profits exceed 10.5%.

As an elected board you have a responsibility to review all rate requests and should not allow the company to circumvent its need to prove increases are necessary. Further, if they overcharge me on my bill, how is it fair that I only get half of what I am overcharged back? That's not right or fair!

I encourage you to reject MDU's proposal to increase my natural gas rates.

Sincerely,  
Mr. Leroy Dockter

Subject: Say No to MDU's Rate Increase

Dear Randy Christmann,

I am a Montana Dakota Utilities (MDU) customer who is concerned about MDU's proposal to raise my natural gas rates. I am asking you to reject their proposal.

MDU's proposal is unfair to consumers like me. MDU should not be allowed to raise its fixed charge to \$21 per month. MDU just increased this same charge from \$9 to \$15 last year and now want another 40% increase in less than a year.

Even if I turn off every gas appliance in my home, I'd still owe MDU \$21 every month even if I'm not using any gas. The proposal gives customers like me less control over my bill and discourages conservation.

Additionally, the proposal DOES NOT increase rates for everyone, it exempts large commercial users and corporations at the expense of hardworking North Dakotans like me. Why isn't the increase shared by all of MDU's customers?

Finally, the proposal is egregious in how MDU proposes to guarantee its profits. The MDU proposal asks for a 10% revenue guarantee each of the next five years without a full rate review by the PSC if MDU's profit drops below 9.5% in a year. Additionally, MDU proposes to keep 50% of what they overcharge me if their profits exceed 10.5%.

As an elected board you have a responsibility to review all rate requests and should not allow the company to circumvent its need to prove increases are necessary. Further, if they overcharge me on my bill, how is it fair that I only get half of what I am overcharged back? That's not right or fair!

I encourage you to reject MDU's proposal to increase my natural gas rates.

Sincerely,  
Mr. Clay Baxter

Additionally, MDU proposes to keep 50% of what they overcharge me if their profits exceed 10.5%.

As an elected board you have a responsibility to review all rate requests and should not allow the company to circumvent its need to prove increases are necessary. Further, if they overcharge me on my bill, how is it fair that I only get half of what I am overcharged back? That's not right or fair!

I encourage you to reject MDU's proposal to increase my natural gas rates.

Sincerely,  
Mr. John D Smith Smith

Subject: Say No to MDU's Rate Increase

Dear Brian Kalk,

I am a Montana Dakota Utilities (MDU) customer who is concerned about MDU's proposal to raise my natural gas rates. I am asking you to reject their proposal.

MDU's proposal is unfair to consumers like me. MDU should not be allowed to raise its fixed charge to \$21 per month. MDU just increased this same charge from \$9 to \$15 last year and now want another 40% increase in less than a year.

Even if I turn off every gas appliance in my home, I'd still owe MDU \$21 every month even if I'm not using any gas. The proposal gives customers like me less control over my bill and discourages conservation.

Additionally, the proposal does not increase rates for everyone, it exempts large commercial users and corporations at the expense of hardworking North Dakotans like me. Why isn't the increase shared by all of MDU's customers?

Finally, the proposal is egregious in how MDU proposes to guarantee its profits. The MDU proposal asks for a 10% revenue guarantee each of the next five years without a full rate review by the PSC if MDU's profit drops below 9.5% in a year. Additionally, MDU proposes to keep 50% of what they overcharge me if their profits exceed 10.5%.

As an elected board you have a responsibility to review all rate requests and should not allow the company to circumvent its need to prove increases are necessary. Further, if they overcharge me on my bill, how is it fair that I only get half of what I am overcharged back? That's not right or fair!

I encourage you to reject MDU's proposal to increase my natural gas rates.

Sincerely,

Dear Brian Kalk,

I am a Montana Dakota Utilities (MDU) customer who is concerned about MDU's proposal to raise my natural gas rates. I am asking you to reject their proposal.

MDU's proposal is unfair to consumers like me. MDU should not be allowed to raise its fixed charge to \$21 per month. MDU just increased this same charge from \$9 to \$15 last year and now want another 40% increase in less than a year.

Even if I turn off every gas appliance in my home, I'd still owe MDU \$21 every month even if I'm not using any gas. The proposal gives customers like me less control over my bill and discourages conservation.

Additionally, the proposal does not increase rates for everyone, it exempts large commercial users and corporations at the expense of hardworking North Dakotans like me. Why isn't the increase shared by all of MDU's customers?

Finally, the proposal is egregious in how MDU proposes to guarantee its profits. The MDU proposal asks for a 10% revenue guarantee each of the next five years without a full rate review by the PSC if MDU's profit drops below 9.5% in a year. Additionally, MDU proposes to keep 50% of what they overcharge me if their profits exceed 10.5%.

As an elected board you have a responsibility to review all rate requests and should not allow the company to circumvent its need to prove increases are necessary. Further, if they overcharge me on my bill, how is it fair that I only get half of what I am overcharged back? That's not right or fair!

I encourage you to reject MDU's proposal to increase my natural gas rates.

Sincerely,  
Mrs. Mary Larson

Subject: Say No to MDU's Rate Increase

Dear Julie Fedorchak,

I am a Montana Dakota Utilities (MDU) customer who is concerned about MDU's proposal to raise my natural gas rates. I am asking you to reject their proposal.

MDU's proposal is unfair to consumers like me. MDU should not be allowed to raise its fixed charge to \$21 per month. MDU just increased this same charge from \$9 to \$15 last year and now want another 40% increase in less than a year.

Even if I turn off every gas appliance in my home, I'd still owe MDU \$21 every month even if I'm not using any gas. The proposal gives customers like me less control over my bill and discourages conservation.

Additionally, the proposal does not increase rates for everyone, it exempts large commercial users and corporations at the expense of hardworking North Dakotans like me. Why isn't the increase shared by all of MDU's customers?

Finally, the proposal is egregious in how MDU proposes to guarantee its profits. The MDU proposal asks for a 10% revenue guarantee each of the next five years without a full rate review by the PSC if MDU's profit drops below 9.5% in a year. Additionally, MDU proposes to keep 50% of what they overcharge me if their profits exceed 10.5%.

As an elected board you have a responsibility to review all rate requests and should not allow the company to circumvent its need to prove increases are necessary. Further, if they overcharge me on my bill, how is it fair that I only get half of what I am overcharged back? That's not right or fair!

I encourage you to reject MDU's proposal to increase my natural gas rates.

Sincerely,  
Mrs. Larry Buechler

Subject: Say No to MDU's Rate Increase

Dear Randy Christmann,

I am a Montana Dakota Utilities (MDU) customer who is concerned about MDU's proposal to raise my natural gas rates. I am asking you to reject their proposal.

MDU's proposal is unfair to consumers like me. MDU should not be allowed to raise its fixed charge to \$21 per month. MDU just increased this same charge from \$9 to \$15 last year and now want another 40% increase in less than a year.

Even if I turn off every gas appliance in my home, I'd still owe MDU \$21 every month even if I'm not using any gas. The proposal gives customers like me less control over my bill and discourages conservation.

Additionally, the proposal does not increase rates for everyone, it exempts large commercial users and corporations at the expense of hardworking North Dakotans like me. Why isn't the increase shared by all of MDU's customers?

Finally, the proposal is egregious in how MDU proposes to guarantee its profits. The MDU proposal asks for a 10% revenue guarantee each of the next five years without a full rate review by the PSC if MDU's profit drops below 9.5% in a year. Additionally, MDU proposes to keep 50% of what they overcharge me if their profits exceed 10.5%.

As an elected board you have a responsibility to review all rate requests and should not allow the company to circumvent its need to prove increases are necessary. Further, if they overcharge me on my bill, how is it fair that I only get half of what I am overcharged back? That's not right or fair!

I encourage you to reject MDU's proposal to increase my natural gas rates.

Sincerely,  
Mrs. Rae Ann Vandrovec
