RE: Reclamation Update PU-15-97

Dear Sara

As noted in our January letter we wanted to allow springtime to reveal how our reclamation on the above captioned project was coming along.

I am happy to report that we are well on our way. We did have some areas of settling this spring which we have supplemented with additional topsoil and have reseeded those areas. We continue to monitor for weeds and treat as necessary and will continue to monitor those areas that required additional attention this spring to ensure adequate revegetation.

I was informed earlier this week that Luke Toso with Wenck and Associates is planning another visit to the project in early August. I trust that he will find conditions satisfactory and look forward to seeing any report he may provide to you.

Feel free to contact me directly at 307-266-0275, if you need any further information or if you have any questions.

Sincerely,

Ken Dockweiler
Director Land Government and Compliance
