---

Melissa,

Please see attached map. The red line would be our 1200ft restrictive easement. The purple and yellow lines are your pipeline, purple being the most current shape files you sent. The closest your pipeline gets to our restrictive easement looks to be approximately 9.5'. The pipeline is out of our easement but if possible we recommend being as far away from our easement as possible. Thanks.

Subject: RE: Sacagawea Pipeline Project

Cy,

Thank you for your response. Our analysis was based on measuring the distance from the center of an ICMB launch or launch control facility as is outlined in NDCC Chapter 69-06-08 (1)(h). Whether the facility is within 1,200 feet of Project depends on where the "geographic center" of the facility is. The point in the center of the facility (see attached screen shot) is where the measurement was taken resulting in the facility falling outside of the 1,200 threshold.

The North Dakota Public Service Commission has held a public hearing on the Project. Because this concern is brought to our attention late in the process, I am requesting your guidance on what needs to be done. Does your concern require an actionable item, or is documentation of our correspondence sufficient?

Feel free to call me to discuss further if necessary. Thank you for your time.

Melissa,

After reviewing the proposed PPL route, the AF has one concern. Near our missile site I-04 in Township 155N range 91W section 34, the pipeline appears to be within or tangent to the 1200' easement of the missile site.

Melissa,

Could you please provide me with new shape files for review?

Thanks

Cy,

The centerline has deviated slightly in locations, however the Project Corridor depicted on the shapefiles you received remains the same. I can provide new shapefiles for your review if you prefer.

Thank you,

Melissa,

Last shape files I received for both projects were back in Jan 2015. Has anything changed?

Subject: Sacagawea Pipeline Project

Importance: High

Mr. Munos,

E3 Environmental, LLC (E3) has been retained by Paradigm Midstream Services-ND, LLC to provide environmental consulting support for the Sacagawea Pipeline Project. E3 provided project notification to the Minot Air Force Base Cable Affairs Office in January 2015 for the Palermo Pipeline Project and the Sacagawea Pipeline Project (the projects have since been combined). For your convenience, I have attached the original notification letters. Please let me know if you have any comments on the Project.

Thank you,

Melissa Schmit
