Sacagawea Pipeline Company, LLC – Sacagawea Pipeline Project, Littlefield Reroute

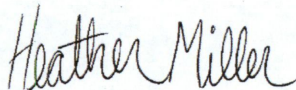

Sacagawea Pipeline Company, LLC (“Sacagawea”) has proposed a reroute on the Sacagawea Pipeline Project in Section 22 T152N, R92W to be known as the Littlefield Reroute. Sacagawea engaged Keitu Engineers & Consultants, Inc. (“Keitu”) to review the survey information submitted in conjunction with the original application, as well as perform any additional environmental and cultural resource siting studies required.

Keitu performed an additional environmental survey on March, 23, 2016. Keitu conducted a database search for all other exclusion or avoidance criteria, as outlined in the North Dakota Administrative Code, along the Littlefield Reroute. Items reviewed included federal and state parks, protected and sensitive plants and animals, and civil and social structures such as recreational areas, rural homes, and farmsteads.

Keitu engaged Metcalf Archaeological Consultants, Inc. to perform a supplemental Class III cultural resource inventory on a 200-foot-wide corridor on March 31, 2016. No other cultural resources (i.e., sites, buildings, structures, objects, or districts that are at least 50 years in age) were encountered during the inventory. A SHPO concurrence letter was received on April 18, 2016.

During the review of available information and supplemental field surveys, no exclusion and avoidance areas were found that will be impacted by the proposed Littlefield Reroute.

As always, Keitu appreciates the opportunity to assist our client and the regulatory agencies with compliance. If you have any questions on this matter I can be reached at (701) 667-1808 ext 113 or via email at hmill@keitu.com.
