Sacagawea Pipeline Company, LLC – Sacagawea Pipeline Project, Reroute 1

A proposed Sacagawea Pipeline Project reroute (Reroute 1) was surveyed on May 4th, 2016 in Section 27 T151N, R93W. The Supplemental Survey completed in this area was approximately 8 acres and is located near the city of New Town, North Dakota.

Keitu Engineers & Consultants, Inc. (Keitu) conducted a natural resources field survey in order to identify exclusion and avoidance areas as specified in the North Dakota Administrative Code 69-06-08-02 for the proposed Reroute 1. When Keitu conducts natural resources field surveys, a concurrent threatened and endangered species survey and habitat assessment; a tree, sapling and shrub survey, and a noxious weed survey is completed.

During this field survey, Keitu did not identify any exclusion and avoidance areas. Although no exclusion or avoidance areas were identified, an estimated area approximately 200 square foot of Canada thistle (*Cirsium arvense*) was identified in the proposed Reroute 1 corridor. According to the North Dakota Century Code Chapter 63-01.1 and the North Dakota Department of Agriculture, Canada thistle is recognized as a noxious weed. The construction contractor was notified of the area and a weed wash station will be set up during construction.

Sacagawea Pipeline Company, LLC has identified in the Sacagawea Pipeline Project – Construction, Mitigation, and Reclamation Plan proper procedures for noxious weed control. This plan outlines cleaning procedures for equipment, pre-construction treatments, post-construction treatments, and addresses weed control during reclamation.

A total of 10 trees and shrubs were found to be 1 inch or greater at breast height. These 10 choke cherries will be added to the Tree and Shrub Mitigation Plan and will need to be replaced at a 2 to 1 ratio.

As always, Keitu appreciates the opportunity to assist our client and the regulatory agencies with compliance. If you have any questions on this matter I can be reached at (701) 667-1800 or via email at rking@keitu.com.
