North Dakota Public Service Commission

600 East Boulevard Dept. 408

Bismarck, ND 58505

Commissioners:

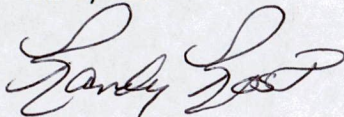

I am a traditional conservative/libertarian and am very much pro domestic energy. I certainly don't embrace many of the "green" policies, but when wind energy gets this country closer to TRUE energy independence, I am all for it.

Hello, my name is Randy Rost and I am currently president of Border Power LLC. I could become involved in any type of energy development whether it be oil, gas, hydro, or coal. The fact is, up here in the Turtle Mountain area, we don't have those other resources, but we do have wind and a lot of it.

For a good share of my 60 plus years of being a North Dakotan, we have been the brunt of many jokes with many people not even knowing where North Dakota was. Well, now that the shoe is on the other foot let's not miss this opportunity to maximize another source of energy.

A proud North Dakotan

Randy Rost

A handwritten signature in cursive script that reads "Randy Rost".
