VANTAGE PIPELINES US LP, TEN YEAR PLAN

for

VANTAGE WEST SPUR LATERAL PIPELINE and VANTAGE PIPELINE

NORTH DAKOTA

**Not available at the time of filing this Application
Vantage will supplement this filing upon completion of this plan**

Pursuant to the North Dakota Energy Conversion and Transmission Facility Siting Act, Chapter 49-22, Section 49-22-04 (Ten-year plans contents), the report will contain the following information.

1. A description of the general location, size, and type of all facilities to be owned or operated by the utility during the ensuing ten years, as well as those facilities to be removed from service during the ten-year period.
2. An identification of the location of the tentative preferred site for all energy conversion facilities and the tentative location of all transmission facilities on which construction is intended to be commenced within the ensuing five years and such other information as may be required by the commission. The site and corridor identification shall be made in compliance with the criteria published by the commission pursuant to section 49-22-05.1.
3. A description of the efforts by the utility to coordinate the plan with other utilities so as to provide a coordinated regional plan for meeting the utility needs of the region.
4. A description of the efforts to involve environmental protection and land-use planning agencies in the planning process, as well as other efforts to identify and minimize environmental problems at the earliest possible stage in the planning process.
5. A statement of the projected demand for the service rendered by the utility for the ensuing ten years and the underlying assumptions for the projection, with that information being as geographically specific as possible, and a description of the manner and extent to which the utility will meet the projected demands.
6. Any other relevant information as may be requested by the commission. Upon receipt of the ten-year plans the commission shall proceed to assess the impact of the development proposed within the state to ensure that energy conversion facilities and transmission facilities will be sited in an orderly manner compatible with environmental preservation and efficient use of resources.
