---

Grady,

There are no known Bald or Golden Eagle nest sites within or near the project area. The closest known nests are approximately 20 miles from the project area.

Let me know if you have any other questions,  
Sandy

Sandra,

I have attached a map of a proposed wind farm near Tioga, ND called the Lindahl Wind Farm. Can you please check to see if there are any bald or golden eagle nests in or near the project area.

Thanks

Grady Wolf
