Good Morning and Welcome to Tioga

My name is Kevin Eide and I am a Third generation landowner in Lindahl Township.

Just a little background on me

I spent my formative years on this land farming and ranching with my parents. I later went on to a forty year career in the Oil and Gas Industry. During that time I witnessed first hand the good as well as the bad of that industry in respect to the Health, Safety and Environment in regards to it's affect on citizens, wildlife and the land.

Today we are here concerning the development of a wind farm on and near the land I grew up on. I think it is a great concept and I whole heartedly endorse it. In comparison to Oil and Gas I feel the HS&E risk's of wind turbines is relatively low. Make no mistake though I am very much loyal to the Oil and Gas Industry which was very good to me.
