**Re: Case No. PU-15-725, ONEOK Bakken Pipeline, L.L.C.
Spring Creek Pump Station Project – McKenzie Cnty**

The North Dakota Public Service Commission retained Keitu Engineers & Consultants, Inc. as a third-party vendor to provide construction inspection services in the above-referenced case. A copy of the Reclamation and Revegetation Inspection Report filed by Keitu as well as the Commission's Order in this proceeding is accessible through the Commission's website at the following links:

Reclamation and Revegetation Inspection Report:
<https://psc.nd.gov/database/documents/15-0725/047-020.pdf>

Commission Order:
<https://psc.nd.gov/database/documents/15-0725/027-040.pdf>

The following items require follow-up as discussed in the Reclamation and Revegetation Inspection Report:

1. The access road should have gravel laid on the surface or be revegetated to prevent stormwater runoff as it is currently at risk of having sediment runoff during a rainfall event. (See Photo 1)
2. Management of Canada thistle onsite. North Dakota law requires everyone to do all things necessary and proper to control the spread of noxious weeds in North Dakota. (See Photo 2)
3. Apply stormwater BMPs to soil pile as it is currently at risk of having sediment runoff during a rainfall event. (See Photo 3)
4. Improve housekeeping onsite to prevent and remove trash from accumulating at the Project site. (See Photo 5)
5. Stormwater BMPs (silt fences) need maintenance to be in proper working condition. (See Photo 4)

Please provide an update to include photographs within 30 days to demonstrate compliance with these requirements.

If you have any questions regarding this letter, please contact me at 701-328-4153.

Sincerely,

A handwritten signature in black ink that reads "Sara Cardwell". The signature is written in a cursive style with a large, looping initial "S".
