ND SHPO REF: 16-0443B ND PSC PU-16-042 "Brady II Wind Energy Center: Class III Historic Architectural Resources Survey Hettinger, Slope, and Stark Counties, North Dakota" and your proposed mitigation letter dated June 23, 2016

Gereld Gerntholz
Valley City - Vice President

Dear Mr. Sexton,

Albert I. Berger
Grand Forks - Secretary

We reviewed ND SHPO REF: 16-0443B ND PSC PU-16-042 "Brady II Wind Energy Center: Class III Historic Architectural Resources Survey Hettinger, Slope, and Stark Counties, North Dakota" and your proposed mitigation letter dated June 23, 2016, and find them both acceptable.

Calvin Grinnell
New Town

As you know there are seven aspects of integrity used to assist in the determination of eligibility of historic sites, (Location, Design, Setting, Materials, Workmanship, Feeling and Association) and we find that three of them are impacted by the intrusions of the turbines within two miles of these seven architectural sites. The impacts are to the setting, feeling and association of these historic sites, which can no longer be appreciated in the same homestead, agricultural, and peaceful serenity settings previously associated with typical folk and regional ethnic architecture and cemeteries.

Diane K. Larson
Bismarck

The 2017 summer field school under the direction of Dr. Anna Andrzejewski (University of Wisconsin - Madison) and Professor Tom Carter, (University of Utah) the "e-book" documenting these structures, and the Public Historic Outreach Day in Hettinger County are all mitigation efforts that will maximize the potential to learn more from these resources and from the descendants of those who built them.

Chester E. Nelson, Jr.
Bismarck

We look forward to updates on these mitigation projects at least every six months until completed.

A. Ruric Todd III
Jamestown
