

7. Brady Wind II received a concurrence letter from NDSHPO concluding no archeological resources will be impacted. This letter was filed with the Commission on August 30, 2016, in docket entry 89.
8. In accordance with the Certification Relating to Order Provisions and Order, Brady Wind II certifies as follows:
 - a. Construction activities have been, and will continue to be, conducted wholly within the site as designated in the Order. All necessary right-of-way easements within the specified site have been acquired.
 - b. As demonstrated previously in this case, an environmental analysis was conducted for Brady Wind II and evaluated the wind energy conversion facility site relative to the Exclusion and Avoidance Areas set forth in N.D. Admin. Code § 69-06-08-01.
 - c. The modifications will not permanently affect any known Exclusion or Avoidance Areas.
 - d. Only minor, temporary impacts will affect avoidance areas. A shift of the collection line southeast of the 53rd Street and 109th Street intersection will result in temporary impacts to 0.05 acres of wetlands during construction. Wetland impacts are still below 0.10 acres and therefore notification to the United States Army Corps of Engineers is not required.
 - e. The wetland determination previously filed with the Commission does not include the wetlands that will be temporarily impacted, and as a result, the performance of a new determination is required.
 - f. Pursuant to Order Provision No. 5, Brady Wind II will complete an addendum to the wetland determination previously filed with the Commission that includes the new determination, and file that addendum with the Commission once it is completed.
9. Brady Wind II will continue to comply with the Order in this case designating the site, and will continue to comply with all applicable federal, state, and local laws and rules.
