West River Telecommunications Cooperative

Certification of Compliance with Applicable Service Quality Standards and Consumer Protection Rules for Voice and Broadband Services

Service quality standards and consumer protection rules for broadband are not as defined as the rules for voice services. The Company complies with any service quality standards and consumer protection rules for broadband that are out there now and any that will be defined in the future.

Service Quality Standards

For voice services, the Company:

- Provides voice grade access to the public switched network.
- Provides flat rated local exchange service with no additional charge to end users.
- Provides access to the emergency services provided by local government or other public safety organizations, such as 911 and enhanced 911.
- Provides toll blocking and toll limitation services.

For voice and broadband services, the Company:

- Advertises the availability of its services and the charges using media of general distribution and/or on its website.
- Maintains a business office providing customers with access to a customer service representative either in person or via a local telephone call or toll-free telephone number during business hours.
- Directs after hour calls to the Company's help desk.
- Directs trouble reports to the on-call technician.
- Tracks all service orders to ensure they are completed in a timely manner.
- Measures its service connection and service interruption performance on a regular basis.
- Trains employees to:
 - Answer all incoming calls promptly.
 - Respond to all inquiries for information promptly and courteously.
 - Investigate thoroughly all customer complaints and handle appropriately according to the Company's guidelines for resolution of customer complaints.
 - Be knowledgeable about products and service offerings so they can assist the customer with selecting the best service option.
- Has a process for periodic inspection, testing and preventive maintenance of its equipment to permit the rendering of safe, adequate and continuous service at all times.
- Meets or exceeds the standards established by the state commission and provides any reports required in accordance with the state commission's rules.

Consumer Protection Rules

The Company has established operating procedures designed to facilitate compliance with applicable consumer protection rules which include compliance with the Customer Proprietary Network Information (CPNI) rules. The operating procedures include:

- Appointment of a compliance officer.
- A manual detailing the specific procedures for protecting consumer information.
- Employee training on an annual basis.
- A disciplinary process for improper use of consumer information.

If complaints are filed with the Company regarding consumer protection rules, the complaint is immediately investigated, the matter tracked and any corrective action noted. This process ensures that problems are addressed and corrections made.

Functionality in Emergency Situations

Back-Up Power

West River Telecommunications Cooperative has backup power sources for all of its telecommunications equipment. Twenty two of WRT's twenty four Central Office (CO) switching buildings have standby generators as well as standby generators at 11 wireless local loop tower site locations. Every CO and tower site has battery reserves for continued operation of 12 hours or more. The CO's without standby generators have high capacity batteries with power reserves that can maintain continued operation for more than 12 hours. All remote DLC cabinets as well as NIDs have at least 8 hours of battery reserve in case of a power outage. WRT also maintains 15 small portable generators for its DLC nodes and 1 large portable generator on wheels for CO backup power when needed.

Rerouting of Traffic around Damaged Facilities

WRT uses ring/diverse route transport technology between twenty two of its twenty four exchanges for voice, broadband and special access circuits including interexchange, intrastate and interstate traffic to protect from outages due to damaged facilities or equipment failures. All twenty four exchanges have redundant transport components to protect against equipment failure.

Traffic Spikes

WRT engineers its switching and broadband capacity for peak traffic periods and has additional capacity available if required. Three times the current Broadband usage to the internet is available as customer demand requires.

West River Telecommunications Cooperative

Description of Tribal Engagement

For Form 481 Line 920 thru Line 929

The Company provides services in two tribal areas, to-wit: Standing Rock Tribe and Three Affiliated Tribes. On January 29, 2015 WRT made an email request to be placed on the agenda for the Standing Rock Sioux Tribe Economics Committee meeting. The request was granted. CEO/GM Bonnie Krause and Plant Manager James Byerley met with the Economics Committee on 2-23-15. In attendance were Econ Chairman Paul Archambault, and committee members Ben Harrison and Duane Claymore. WRT provided an update on the 2014 FTTP project in the Selfridge, ND exchange and discussed plans to install FTTP in the Fort Yates exchange in 2015 as well as plans to install fiber to the entire SRST area in the near future. The 2015 Fort Yates project was explained in detail including the existing FTTP to the Tribal community anchor institutions. The information received a very positive response from the Economics Committee. The committee members indicated that we should continue to work with the Tribal Historical Preservation Office and the BIA pertaining to right of way, permitting, cultural and archeological preservation. No questions or requests were made by the committee pertaining to marketing of services on the reservation. Chairman Archambault indicated that the Econ Committee is the proper committee to meet with related to these matters and the entire committee thanked WRT for the great work being done to upgrade services to the reservation.

In accordance with provisions in the FCC's USF and ICC Transformation Order, paragraphs 636 and 637, and 47 CFR 54.313(a)(9), at the meetings with the Tribal Authorities, the Company will, with tribal input, develop a needs assessment to assist with future service deployments on Tribal lands. In particular, the Company and the Tribal Authority discussions relating to needs and service deployment will be focused on community anchor institutions. The feasibility and sustainability of communications services on tribal lands will be discussed and the Company will, with assistance from the Tribal Authorities, attempt to identify additional steps that can be taken to make essential communications services deployed on Tribal lands both feasible and sustainable. The Company and Tribal Authorities will also discuss and explore ways in which they can coordinate or partner to ensure that services are marketed on tribal lands in a manner that will relate to the community and resonate with consumers, with the aim of increasing service adoption. At such meetings, the Company will also be prepared to discuss the relevant rights-of-way and other permitting and review processes, as well as any challenges associated with these processes. And finally, the Company will come to any such meetings prepared to discuss and engage the Tribal Authorities on any relevant and applicable Tribal business and licensing requirements
