**Cc:** wind.energy.matters@noaa.gov  
**Subject:** Re: FW: Final coordinates and elevations for Oliver III array

Mark,

Thank you for passing along the updated information on the Oliver III Wind project. We appreciate your efforts to relocate the turbines in the southeast corner of the project outside of the "consultation zone" and we have concurred this with your latest coordinates and elevations. At this time, we only request further notification of the project if the elevations or locations of turbines change.

Thank you,  
Jessica Schultz  
NWS Radar Program Manager

Please find the final coordinates and elevations of the turbines for Oliver III Wind, located in Morton and Oliver County ND. Per your request, we have provided the location and elevation of the project. The turbines in the southeast corner of the project are located such that they are setback from the boundary as shown in the review. We look forward to working with you on any subsequent moves if they are required. Please let me know if you have concerns regarding the locations provided.

Sincerely,

Mark Trumbauer,

Project Manager, NextEra Energy

Tim, could you send me the final survey coordinates for the wind turbines and met towers. This is the array where we have T34 and T15 relocated.

I need a clean list to send to NOAA now.

Thanks.
