Dear Ms. Schmidt:

RE: ETP Pipeline Project

The Hess Corporation is planning the construction of an approximately 1.1 mile, 12-inch diameter crude oil pipeline in Williams County, North Dakota.

The National Wetland Inventory indicates various wetlands within the proposed project area. Steps should be taken to protect any wetlands that cannot be avoided, no alterations should be made to existing drainage patterns, and above-ground appurtenances should not be placed in wetland areas. Unavoidable destruction or degradation of wetland acres should be mitigated in kind. We ask that work within wooded draws and native prairie areas be avoided to the extent possible and disturbed areas be reclaimed to pre-project conditions.

We do not believe this project will have significant adverse effects on wildlife or wildlife habitat, including species of conservation priority, provided these recommendations are implemented where appropriate.

Sincerely,

Greg Link  
Chief

Conservation & Communication Division
