Description (summarize the observations on which you rely to allege the violation) *If more space is required, please provide the description on a separate page.*

Continental Resources (CLR) has a lease on the Langved property and had previously installed a 5 wire, bamed wire fence around the well site in an attempt to keep his cattle safe from the drilling location. This fence was put in place in October 2015 when the project began. Due to a host of issues we have had in the past with Mr. Langved CLR hired an armed private security company to provide a safe work environment for our employees and contract employees through the duration of the project. On 6-4-16 our security team witnessed Langved removing wire and pulling fence posts from the ground with a skid steer. Langved then used the skid steer with an attached post hole digger to drill new post holes and move the fence approximately 25 feet in an area where he knew electrical services and buried pipelines to be. A call was made to one call to verify if Langved had called prior to his project and it was learned he did not. Because of the dangers associated with this carelessness I am respectfully requesting this incident be investigated.
