

ENVIRONMENTAL POLICY

Enbridge believes that minimizing the environmental footprint and impact associated with our activities delivers value to shareholders, stakeholders, customers and employees. Enbridge's Environmental Management System, including its environmental protection program, has been established to protect and sustain the environment throughout the lifecycle of design, construct, operate and abandon, and to anticipate, prevent, manage and mitigate conditions that could adversely affect the environment.

This Environmental Policy supports Enbridge's values of Integrity, Safety, and Respect by guiding our actions, policies, procedures and culture; providing the philosophy and approach for responsible environmental management.

Our goal is to foster a learning, just, and flexible organizational culture where environmental excellence is an integral element in the conduct of our business.

Enbridge will:

- Identify how we interact with and impact the environment.
- Minimize adverse environmental effects through effective planning and execution.
- Comply with government regulations and applicable industry standards.
- Effectively respond to unanticipated events.
- Provide appropriate training to ensure employees and contract workers understand their responsibility to protect the environment.
- Promote a culture where environmental excellence is everyone's responsibility.
- Actively engage with the public and government regarding our environmental activities.
- Learn from our experiences in order to continually improve our competency and performance.
- Maintain a non-retaliatory culture that encourages reporting and investigation of environmental hazards, potential hazards, near-misses, incidents and non-compliances.

Guy Jarvis

President, Liquids Pipelines
