Thanks for sending these, Kathy. We'll take a look at them and let you know what we think.

Kurt,

Thanks for checking in, we have completed the surveys for the Project. Please find attached GIS shapefiles including the wetlands surveyed on FWS easements, and our survey corridor. The survey corridor represents the extent to which we surveyed for wetlands, any wetlands outside of this boundary may not have been mapped. Let me know if you have any questions or need any additional information.

Hi, Kathy.

I was just wondering if you have had a chance to finalize the shapefiles from the wetland survey.

**Attachments:** 20160804125141.pdf

Below is the SHPO's response to the change in the Study Area. The attached letter is the original letter.

Is there anything we need to do file this email with the docket?

Thanks,  
Adam

Hi Adam,

Thank you for your update letter that widens the project area to include [T141N R56W Sections 17, 20] Barnes County, North Dakota. As you probably already know there are no sites and no cultural resource surveys. The survey requirements are the same as outlined for the bulk of the project. A copy of my June 8, 2016 letter is attached as reference.

Looking forward to review of the archeological and architectural reports on Glacier Ridge.
