Shelly-please see attached PDF report on behalf of Pro Seed.

To recap-I calibrated and last tested the scale on 9/22/16. A sticker dated 9/22 was left onsite at that time. Today, 12/2/16, I contacted Eric Vein at Pro Seed, told him where the calibration sticker was located, and asked him to affix it to the scale indicator. He sent me a photo confirming this had been done, as well as a photo of the variance posted next to the scale indicator.

Let me know if we have any issues or you need anything else please. Thanks for your help Shelly.
