

**STATE OF NORTH DAKOTA**  
**PUBLIC SERVICE COMMISSION**

**Arrow Field Services, LLC**  
**10-Inch & 8-Inch NGL Pipeline Project – McKenzie**

**Case No. PU-17-048**

---

**CERTIFICATION OF APPLICANT PURSUANT TO NORTH  
DAKOTA CENTURY CODE § 49-22.1-15**

---

STATE OF TEXAS

COUNTY OF HARRIS

Curt Van Hoorn, being first duly sworn upon oath, states and alleges as follows:

1. I am the Vice President of Operations for Arrow Field Services, LLC (“Arrow”) with authority to provide information on behalf of Arrow. In this position, I am familiar with the above-captioned matter and have the authority to bind Arrow with respect to the certification made herein.

2. In an order dated June 30, 2017 in the above-captioned matter, the Public Service Commission (“Commission”) approved Certificate of Corridor Compatibility No. 199 for the designated corridor (“Corridor”) and Route Permit No. 210 designating the route (“Route”) for the construction, operation, and maintenance of the project, which includes an 8-inch NGL pipeline and a 10-inch residue gas pipeline (“Project”). The Certification Relating to Order Provisions – Transmission Facility Siting (“Order Certification”) executed by Arrow was incorporated by reference and attached to the order issued by the Commission.

3. I submit this certification in accordance with North Dakota Century Code (“N.D.C.C.”) §§ 49-22.1-15 and 49-22.1-15(3) in support of Arrow’s corridor adjustment for the Project.

4. On September 22, 2017, Arrow submitted a route adjustment pursuant to N.D.C.C. § 49-22.1-15(3) required to facilitate interconnection of the Project with a Northern Border facility and a ONEOK facility. *See* Case No. PU-17-048, Docket No. 47.

5. To safely construct the third party interconnects, Arrow has determined that additional temporary workspace is required to safely bore multiple pipelines in the area. As part of the bore process, Arrow will weld a continuous length of pipe equal to the bore length to allow for a continuous pull of the pipe. A map depicting the additional temporary workspace for this bore pullback area is attached as **Exhibit A**.

6. As noted in the previous filing, the length of the route adjustments under N.D.C.C. § 49-22.1-15(3) extending outside of the Corridor are less than one and one-half miles in length and the additional temporary workspace outside of the Corridor similarly extends less than one and one-half miles.

7. Appropriate landowner coordination has occurred. Arrow is a wholly owned subsidiary of Crestwood Equity Partners, LP (“Crestwood”), and Crestwood is the owner of the property on which the pipeline route adjustment and associated corridor adjustment for the third party interconnects and additional temporary workspace is located. Accordingly, no owner of real property on which an adjustment is to be located and no applicable governmental entity with an interest in the same adjustment area oppose the adjustment.

8. Supplemental surveys were conducted by SWCA Environmental Consultants (“SWCA”) for the route adjustment with respect to Natural Resources and Cultural Resources. Such surveys also included the additional temporary workspace area.

9. On August 9 and 22, 2017, SWCA completed a natural resources survey of the proposed pipeline route adjustment and surrounding areas located in the SW¼ of Section 29,

Township 149 North, Range 98 West, McKenzie County, North Dakota, which also included the additional temporary workspace. No wetlands, woody vegetation, noxious weeds, or threatened or endangered species or habitat were observed within the area surveyed. A copy of the Addendum to the Natural Resources Report for the Arrow NB Residue Gas Pipeline and Arrow Bakken NGL Pipeline Project in McKenzie County, North Dakota prepared by SWCA is attached hereto as **Exhibit B**.

10. On August 22, 2017, SWCA completed a cultural resources survey of a 7.9-acre area, which included the route adjustment previously submitted to the Commission and the area required for the additional temporary workspace. The results of the survey are provided in the August 23, 2017 Addendum 2 to a Class I and Class III Cultural Resources Inventory (“Addendum 2”) attached hereto as **Exhibit C**.

11. The Addendum 2 was submitted to the SHPO for review. The SHPO found the Addendum 2 acceptable and determined there has been a good faith effort to identify and avoid impacts to Significant Sites provided the Project remains as mapped and described. A copy of the SHPO letter is attached hereto as **Exhibit D**.

12. Construction activities within the additional temporary workspace adjustment area located outside the designated Corridor will not affect any known exclusion or avoidance areas. *See Exhibits A, B, C, and D.*

13. Arrow will comply with the Commission’s orders, laws and rules designating the corridor and designating the route.

  
Curt Van Hoorn
