RE: CENEX Pipeline LLC Refined Fuels Pipeline Project in Ward County

To whom it may concern,

The Ward County Planning Commission understands the CENEX Pipeline LLC Refined Fuels Pipeline Project (PU-17-097) is under the review of the North Dakota Public Service Commission. Ward County currently does not have zoning ordinances regarding pipelines regulated by the Public Service Commission, thus no permit is required from Ward County at this time. However, the Ward County Planning Commission requests the following:

1. CENEX provide documentation of PSC approval.
2. Crossing Permits be obtained from the Highway Department for all right-of-ways.
3. Plans for any structures must be submitted to the Building Officials to confirm compliance.
4. Prior to using any county or township road as an access or haul road, the local agency must be contacted and an agreement must be in place to maintain and restore the roadways.

If there are any further questions, please contact the Planning and Zoning Administrator.

Regards,

Nancy Simpson  
Planning and Zoning Administrator
