Route Adjustment Certification

CERTIFICATION RELATING TO ROUTE ADJUSTMENT N.D.C.C. § 49-22.1-15(1)

STATE OF MONTANA)
) ss.
COUNTY OF YELLOWSTONE)

Pursuant to N.D.C.C. § 49-22.1-15(1), the undersigned, Greg Brown, President, a representative of Cenex Pipeline, LLC ("Cenex"), with the authority to bind Cenex to the following, hereby certifies as follows:

1. In an Order dated March 14, 2018, in Case No. PU-17-097 ("Order"), the North Dakota Public Service Commission ("Commission") issued Certificate of Corridor Compatibility No. 202 and Route Permit No. 212 to Cenex for the construction and operation of an approximately 149.7 mile 10-inch diameter pipeline located in Williams, Mountrail, and Ward Counties, North Dakota ("Project").

2. Pursuant to N.D.C.C. § 49-22.1-15(1),

   Before or during construction, a utility, without any action by the commission, may adjust the route of a gas or liquid transmission line within the designated corridor if, before conducting any construction activities associated with the adjustment, the utility files with the commission certification and supporting documentation that:

   a. The construction activities will be within the designated corridor;
   b. The construction activities will not affect any known exclusion or avoidance areas within the designated corridor; and
   c. The utility will comply with the commission's order, laws, and rules designating the corridor and designating the route.

3. Pursuant to the statutory certification procedure set forth above, prior to the construction of the Project, Cenex proposes to adjust the route of the pipeline in six locations. The six route adjustments are all located within the Commission approved 200-foot-wide Project corridor. *See* PU-17-097 Order, Docket No. 100, Order Provision No. 2.

4. Upon issuance of the Order, Cenex moved to finalize the remaining right-of-way agreements. During final negotiation, Cenex agreed to one minor modification at the request of a landowner. In addition, two adjustments were required to satisfy section line buffers, two adjustments were required for additional right-of-way associated with

horizontal directional drilling, and one adjustment was required to avoid a sensitive environmental site.

5. Cenex analyzed the potential impacts of the six route adjustments pursuant to the Commission's designated Avoidance and Exclusion Areas (N.D. Admin. Code § 69-06-08-02). Attached to this Certification and incorporated herein as Exhibit 1, is a memorandum and corresponding Project maps that detail the analysis.

6. Construction activities associated with the six route adjustments will occur within the Project's designated corridor. N.D.C.C. § 49-22.1-15(1)(a).

7. The analysis did not identify additional Avoidance or Exclusion Areas along the six proposed route adjustments. As a result, construction activities for the adjustments are not anticipated to result in additional impacts to Avoidance or Exclusion Areas within the Project's designated corridor. N.D.C.C. § 49-22.1-15(1)(b).

8. Cenex will continue to comply with the Commission's Order, laws, and rules designating the Project's corridor and route. N.D.C.C. § 49-22.1-15(1)(c).

Greg Brown
President
Cenex Pipeline, LLC

STATE OF MONTANA)
) ss.
COUNTY OF YELLOWSTONE)

On this 23rd day of May, 2018, before me personally appeared Greg Brown, known to me to be the President of the limited liability company that is described in and that executed the within instrument, and acknowledged to me that such limited liability company executed the same.
